Kring,Sheri L. Fombad,Nico Steytler,2021-03-18 The third wave of democracy that reached African shores at the end of the Cold War brought with it a dramatic decline from 1990 onwards in dictatorships military regimes one party governments and presidents for life Multiparty democracy was at the core of the constitutional revolutions that swept through most of Africa in those watershed years However that wave is either losing momentum or receding or being reversed in its entirety This volume examines democracy and elections in Africa a focus motivated by two concerns First after 30 years it is important to take stock of the state of constitutional democracy on the continent The democratic gains of the 1990s and 2000s seem to be falling by the wayside with the evidence mounting that regimes are concealing authoritarianism under the veneer of elections doing so in an international context where populist regimes are on the rise and free and fair multiparty elections are consequently no longer a given It is becoming a battle to protect and retain constitutional democracy The second reason for this volume s focus on democracy and elections is that multiparty democracy is essential for the proper functioning of the state in addressing the major problems facing Africa internal conflict inequality and lack of development and poor governance and corruption The focus of this volume is thus on how competitive politics or multiparty democracy can be realized and how through competition such politics could lead to better policy and practice outcomes

International Law and Boundary Disputes in Africa Gbenga Oduntan,2015-06-26 Africa has experienced a number of territorial disputes over land and maritime boundaries due in part to its colonial and post colonial history This book explores the legal political and historical nature of disputes over territory in the African continent and critiques the content and application of contemporary International law to the resolution of African territorial and border disputes Drawing on central concepts of public international law such as sovereignty and jurisdiction and socio political concepts such as colonialism ethnicity nationality and self determination this book interrogates the intimate connection that peoples and nations have to

territory and the severe disputes these may lead to Gbenga Oduntan identifies the major principles of law at play in relation to territorial and boundary disputes and argues that the predominant use of foreign based adjudicatory mechanisms in attempting to deal with African boundary disputes alienates those institutions and mechanisms from African people and can contribute to the recurrence of conflicts and disputes in and among African territories He suggests that the understanding and application of multidisciplinary dispute resolution mechanisms and strategies can allow for a more holistic and effective treatment of boundary disputes As an in depth study into the legal socio political and anthropological mechanisms involved in the understanding of territorial boundaries and a unique synthesis of an African jurisprudence of international boundaries law this book will be of great use and interest to students researchers and practitioners in African and Public International Law International Relations and decision makers in need of better understanding the settlement of disputes over territorial boundaries in both Africa and the wider world
