Modern database systems enhance the capabilities of traditional database systems by their ability to handle any kind of data including text image audio and video Today databasesystemsareparticularlyrelevanttotheWeb astheycanprovideinputtocontent generators for Web pages and can handle queries issued over the Internet The eXtensible Markup Language XML is used in applications running the gamut from content management through publishing to Web services and e commerce It is used as the universal communication language for exchanging music and graphics as well as purchase orders and technical documentation As database systems increasingly talk to each other over the Web there is a growingdesiretouseXMLasthestandardexchangeformat Asaresult manyrelational database systems can export data as XML

documents and import data from XML documents and provide query and update capabilities for XML data. In addition, so-called native XML database and integration systems are appearing on the database market whose claim is to be especially tailored to storing, maintaining, and easily accessing XML documents. After the huge success of the first XML Database Symposium XSym 2003 last year in Berlin, already then in conjunction with VLDB, it was decided to establish this symposium as an annual event that is supposed to take place as an integral part of VLDB. The goal of this symposium is to provide a high quality platform for the presentation and discussion of new research results and system developments. It is targeted at scientists, practitioners, vendors, and users of XML and database technologies.

Revising and Editing for Translators Brian Mossop, 2019-09-05

Revising and Editing for Translators provides guidance and learning materials for translation students and professional translators learning to revise the work of others or edit original writing and those wishing to improve their self-revision ability. Revising and editing are seen as reading skills aimed at spotting problematic passages. Changes are then made to meet some standard of quality that varies with the text and to tailor the text to its readership. Mossop offers in-depth coverage of a wide range of topics including copyediting, stylistic editing, checking for consistency, revising procedures, and principles, and translation quality assessment, all related to the professional situations in which revisers and editors work. This revised fourth edition provides new chapters on revising machine outputs and news translation, editing a new section on reviser competencies, and a completely new grading scheme for assignments. The inclusion of suggested activities and exercises, numerous real-world examples, and a reference glossary make this an indispensable coursebook for professional translation programmes.
