

WD1

Water Detector

Installation Manual

Introduction

The WD1 is a two-way wireless water detector designed to trigger an alarm upon contact with water, minimizing the risk of severe water damage from leaks or floods while you are at home or away. Being a two-way device provides an extra level of security and ensures communication to the panel, especially during detection, is received and acknowledged by your system. It is designed to be fixed-mounted or free-standing.

FIGURE 1

Installing the WD1

Prior to fix-mounting the WD1, ensure it was programmed to a panel. To learn the unit, please refer to the corresponding panel programming section in this manual.

The WD1 should be placed on a flat surface where floods, leaks, and water infiltration can occur. Ensure that the detection probes touch the surface being monitored. When water touches any of the three pairs of probes, an alarm will be sent to the panel the WD1 will continue to send an alarm until the panel acknowledges receipt. It is strongly recommended that the WD1 is fixed-mounted with the mounting screw provided.

To Install:

1. Press and hold the tamper button at the bottom of the WD1 for three seconds, the detector will sound an OK beep (three small beeps) to indicate that it is powered up.
2. **Bracket:** Remove the bracket installed under the WD1. Remove the double-sided tape protective film from the bottom of the bracket and secure bracket to the floor. Align the WD1 to the bracket until it snaps into place. Secure the mounting screw using a Phillips screwdriver, as shown in Figure 3.
3. **Without Bracket:** Secure an appropriate flat-head screw using a Phillips screwdriver, as shown in Figure 3.

* The tamper will be activated after being pressed continuously for 10 seconds. Three audible beeps will be heard followed by a blue LED indication.

Installing the ES1 (Optional)

The WD1 can function as a standalone unit or with the optional Extension Sensor. It acts as an extension of the WD1 that allows you to extend (up to 2 meters) or add an additional detection area. Install the extension sensor as shown in Figure 2. Ensure that the extension sensor is laying flat on the surface (any side); it can be secured with a mounting screw. Please note that we do not support any 3.5 mm extension cables.

FIGURE 2

Replacing Battery

1. Remove the mounting screw from the WD1. If a mounting screw has not been installed, proceed to Step 3.
2. Press and release the Tamper button at the bottom of the WD1 to disable the piezo.
3. Using a Phillips screwdriver, remove the three screws located at the bottom of the WD1.
4. Remove the top cover.
5. Remove the old battery and replace with a new battery (verify the polarity and insert properly + and - marked on the battery terminals), see Figure 3.
6. **Caution:** Risk of explosion if battery is replaced by an incorrect type.
6. Reassemble the WD1; ensure that the silicone gasket is secure to avoid any water infiltration.
7. Press and hold the tamper button at the bottom of the WD1 for three seconds, the detector will sound an OK beep (three small beeps) to indicate that it has been powered-up.

Note: We recommend to replace the battery every three years to avoid leakage.
