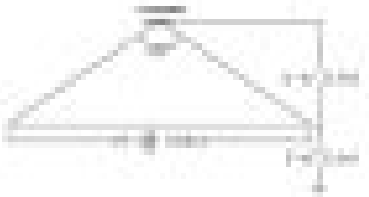
Loudspeaker Installation

Loudspeakers should be installed and connected before powering up the system. Ensure you are supplied with the loudspeaker kit you will require, especially any rings or mounting fittings.

For each loudspeaker:

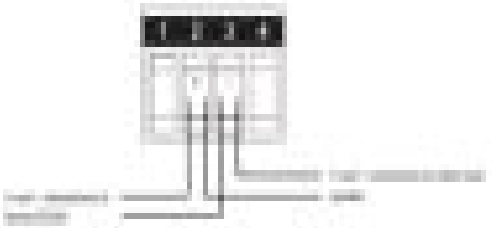
1. Unscrew the white cap/nut from the loudspeaker cable and pass the cable through the ceiling hole. Then screw the nut back onto the loudspeaker body.
2. Push the loudspeaker through the hole. For suspended ceilings, place the 2 plastic spacers from the kit over the cable and then push the loudspeaker into the hole. Ensure the cable does not get caught between the ceiling and the loudspeaker. Insert the 2 metal clips through the 2 slots and down on to the metal collar of the body. Ensure the cable does not get caught between the clips and the loudspeaker body. Pull the cable through the ceiling until the loudspeaker is flush with the ceiling.
3. Connect the grey/red plastic cable on the loudspeaker cable to the loudspeaker connector on the Vortex EF2241 unit. Ensure the colors match (i.e. red to red, grey to grey). Do not connect the loudspeaker cable to the Vortex EF2241 unit at this stage.
4. Push the speaker grille into the hole in the ceiling and tighten the white cap/nut to secure the loudspeaker.
5. Repeat for all loudspeakers.

Detailed loudspeaker location instructions, with diagrams and important cable information, can be found in the manual accompanying the loudspeakers.

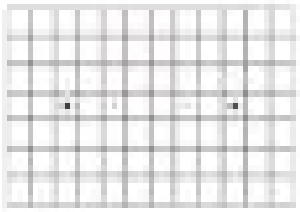


Loudspeaker Wiring

The Vortex supplies loudspeakers in pairs for connection to amplifier channels 1 and 2 and 3 and 4. Wiring from the loudspeakers terminates at the Vortex EF2241 loudspeaker terminal block. A maximum of 4 loudspeakers may be connected to each amplifier channel. Loudspeaker impedance must be 8Ω or 16Ω. Mixing 8Ω and 16Ω loudspeakers on the same amplifier channel is not recommended.



Loudspeaker / Microphone Placement



Please refer to the supplied User Guide for more guidance on loudspeaker placement and microphone installation.
