**Delivering a Preparatory Course for The Cambridge First Certificate in English Examination by Using the Ingenio E-Learning Platform**, 2011-03-24 La publicaci3n de este volumen representa un caso relativamente ins lito Un

pequeño grupo de jóvenes investigadores de menos de treinta años convence a un grupo mucho más numeroso de la misma edad para celebrar en Salamanca la First Conference of Young Researchers on Anglophone Studies. El resultado es deslumbrante. No solo demuestran una gran capacidad organizativa sino que los resultados individuales de las aportaciones científicas son sobresalientes. Este volumen *Current Trends in Anglophone Studies* recoge una selección revisada de las propuestas presentadas en el Encuentro y gira en torno a una estructuración tripartita clásica: estudios culturales lingüísticos y literarios. En ella caben todos aquellos que se mueven en el campo de los estudios anglofonos. Cada uno de estos campos podría haber sido suficiente para celebrar un congreso pero parece razonable que en este tipo de encuentros tengan cabida todos. De ese modo este volumen se convierte en un ejemplo de aproximación interdisciplinar a los estudios anglofonos. Desde un punto de vista cuantitativo los estudios culturales ocupan sin duda un espacio menor. Sin embargo sobresale la variedad de temas tratados: como la internacionalización de los autores dentro de este apartado. Estudiantes españoles e italianos acometen estudios relacionados con la música, la pintura, el cine, la traducción, la marginalidad social o el impacto de las nuevas tecnologías en la producción artística. Si no pareciera demasiado atrevido podría decirse que estos jóvenes estudiosos irán más allá de lo que un día ya lejano pudieron imaginar Richard Hoggard o Raymond Williams. Los estudios aquí presentados reflejan sin duda la evolución que la propia sociedad ha experimentado en estos últimos cincuenta años y exploran la relación entre las prácticas culturales, la vida diaria y los contextos económicos, políticos e históricos. No es de extrañar que una gran parte de las contribuciones presentadas en este volumen se centren en el estudio de la lengua ya que la demanda del inglés se ha incrementado de forma considerable en los últimos años. Sobresalen los análisis puramente filológicos y sobre todo los relacionados con el aprendizaje del inglés como segunda lengua. Por eso destacan estudios que contemplan rasgos morfológicos, léxicos o sintácticos. Sin embargo el mayor número de participaciones hace referencia al ya citado aprendizaje del inglés como L2 tanto desde el análisis de materiales como desde la práctica oral o escrita. Las contribuciones literarias ofrecen una evaluación teórica formal e interpretativa de distintas tendencias desde perspectivas tanto interdisciplinares como interculturales. Cronológicamente los estudios abarcan textos desde el siglo XVIII hasta nuestros días con un acento especial en los autores más contemporáneos y en el género narrativo. En general estos estudios se fijan en textos concretos y los analizan desde perspectivas culturales, sociológicas o psicológicas. Pero abundan menos las aproximaciones desde la teoría literaria, desde la técnica narrativa o como tal vez cabría esperar al tratarse de estudiantes tan jóvenes desde la aplicación de las nuevas tecnologías. Por el contrario se repiten temas como los traumas heredados de la Guerra de Vietnam, las cicatrices del 11 de septiembre o los problemas de género. En definitiva se trata de una selección de artículos claramente prometedora que transmite la seguridad de que el futuro de la Filología Inglesa está en buenas manos y podrá experimentar una positiva evolución en los próximos años. Por todo ello hay que felicitar a todos los participantes individuales y sobre todo a los organizadores del evento y editores de este volumen que han demostrado una enorme capacidad de trabajo y de saber hacer.

*Text Complexity and Reading Comprehension Tests* Erik Castello, 2008 Based on the analysis of a specially compiled corpus of internationally recognized English as a foreign language EFL reading tests at different levels of proficiency this volume explores the relation between the complexity of written texts and the difficulty of reading comprehension tests It brings together linguistic investigations into the text inherent complexity of the tests and a study of the data derived from their administration to groups of Italian university students The study of text complexity draws on corpus linguistics text linguistics and systemic functional linguistics Both quantitative and qualitative analyses are carried out on the language used in the reading texts and in the related tasks that make up the corpus of tests The assessment of test difficulty on the other hand is informed by research on language testing and in particular by findings and methodologies of Classical Test Theory and Item Response Theory Relevant aspects of these theories are used to analyze and interpret both the data obtained from the administration of the tests and the data collected by means of feedback questionnaires completed by test takers The application of such diverse methodologies and the subsequent comparison of the results of the analyses has brought out interesting correlations between text inherent complexity perceived test difficulty and actual test difficulty
