The Evolving Role of the Public Prosecutor Victoria Colvin, Philip Stenning, 2018-09-24 The modern public prosecutor is a figure both powerful and enigmatic Legal scholars and criminologists often identify three essential components of criminal justice systems police courts and corrections Yet increasingly the public prosecutor occupies a distinct role independent from any of these branches Acting outside of the court and therefore largely out of the public eye the prosecutor's control over whether and what charges proceed to court can limit judicial discretion on sentencing open pathways to alternative measures and even deny entry into the criminal justice system entirely In this sense the prosecutor serves as a true gatekeeper to the criminal process This book addresses key aspects of the evolving role of domestic and international prosecutors in common law and civil law systems in the twenty first century and the challenges posed by this evolution This collection of chapters from respected scholars takes an international comparative approach and explores how these different legal systems have borrowed theorisations and articulations of the prosecutorial role from each other in adapting the office to changing conditions and expectations The volume is structured around four main themes relating to the role of the modern prosecutor the nature of the prosecutor's office the role of the prosecutor in investigations

Information Security for Advanced Neuroprosthetics Matthew E. Gladden, 2017-02-20 How does one ensure information security for a computer that is entangled with the structures and processes of a human brain and for the human mind that is interconnected with such a device The need to provide information security for neuroprosthetic devices grows more pressing as increasing numbers of people utilize therapeutic technologies such as cochlear implants retinal prostheses robotic prosthetic limbs and deep brain stimulation devices Moreover emerging neuroprosthetic technologies for human enhancement are expected to increasingly transform their human users sensory motor and cognitive capacities in ways that generate new posthumanized sociotechnological realities In this context it is essential not only to ensure the information

security of such neuroprostheses themselves but more importantly to ensure the psychological and physical health autonomy and personal identity of the human beings whose cognitive processes are inextricably linked with such devices InfoSec practitioners must not only guard against threats to the confidentiality and integrity of data stored within a neuroprosthetic device's internal memory they must also guard against threats to the confidentiality and integrity of thoughts memories and desires existing within the mind of the device's human host This second edition of *The Handbook of Information Security for Advanced Neuroprosthetics* updates the previous edition's comprehensive investigation of these issues from both theoretical and practical perspectives It provides an introduction to the current state of neuroprosthetics and expected future trends in the field along with an introduction to fundamental principles of information security and an analysis of how they must be re-envisioned to address the unique challenges posed by advanced neuroprosthetics A two-dimensional cognitional security framework is presented whose security goals are designed to protect a device's human host in his or her roles as a sapient metavolitional agent embodied embedded organism and social and economic actor Practical consideration is given to information security responsibilities and roles within an organizational context and to the application of preventive detective and corrective or compensating security controls to neuroprosthetic devices their host device systems and the larger supersystems in which they operate Finally it is shown that while implantable neuroprostheses create new kinds of security vulnerabilities and risks they may also serve to enhance the information security of some types of human hosts such as those experiencing certain neurological conditions
