Group 'A' :-

Attempt All questions.

[3x(5+5)=30]

1. a) Construct a  $3 \times 3$  matrix whose elements are given by  
 $a_{ij} = 3i - 2j$ . [5]  
 b) Solve using row equivalent matrix method or Cramer's rule.  

$$\begin{aligned} x + y - z &= 3 \\ 2y + z &= 10 \\ 5x - y - 2z &= -3 \end{aligned}$$
 [5]
2. a) If  $Z$  and  $W$  are two complex numbers, prove that  
 $|z| + |w| \geq |z + w|$  [5]  
 b) State and prove De-Moivre's Theorem. [5]
3. a) Using vector method, prove that  
 $\sin(A + B) = \sin A \cos B + \cos A \sin B$  [5]  
 b) Find the area of the parallelogram determined by the  
 vectors  $\vec{i} + \vec{j} + \vec{k}$  and  $-2\vec{i} + 3\vec{j} + \vec{k}$ . [5]

Teaching and Learning in Maths Classrooms Chiara Andrà,Domenico Brunetto,Esther Levenson,Peter

Liljedahl,2017-05-03 The book presents a selection of the most relevant talks given at the 21st MAVI conference held at the Politecnico di Milano The first section is dedicated to classroom practices and beliefs regarding those practices taking a look at prospective or practicing teachers views of different practices such as decision making the roles of explanations problem solving patterning and the use of play Of major interest to MAVI participants is the relationship between teachers professed beliefs and classroom practice aspects that provide the focus of the second section Three papers deal with teacher change which is notoriously difficult even when the teachers themselves are interested in changing their practice In turn the book s third section centers on the undercurrents of teaching and learning mathematics which can surface in various situations causing tensions and inconsistencies The last section of this book takes a look at emerging themes in affect related research with a particular focus on attitudes towards assessment The book offers a valuable resource for all teachers and researchers working in this area

### **Designing Quality Authentic Assessments**

Tay Hui Yong,2018-04-19 This book examines the principles and practice of authentic assessment It seeks to answer the following questions What is authentic assessment How is authentic assessment different from performance assessment or alternative assessment How can authentic assessment support learner centred education especially when a performance oriented culture favours pen and paper examinations The book is structured into two major parts The first Principles of authentic assessment design provides readers with a conceptual explanation of authenticity the principles for designing quality authentic assessments for valid evidence of student learning and guidance about how to develop quality rubrics to structure assessment tasks The second part of the book Theory into practice provides examples developed by teachers to demonstrate an understanding of authentic assessment The subject areas covered include humanities languages mathematics sciences character and citizenship Two case studies are discussed to demonstrate how authentic assessment can be used to comprehensively address key learning objectives in a variety of curriculum contexts This book provides practitioners with concrete examples on how to develop authentic assessment to suit their context and also enhance their students learning The book will also enable teachers to face assessment challenges present in our changing world Chapter 1 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com>

### **Mathematical Modeling and Simulation of Systems**

Serhiy Shkarlet,Anatoliy Morozov,Alexander Palagin,Dmitri Vinnikov,Nikolai Stoianov,Mark Zhelezniak,Volodymyr Kazymyr,2022-02-23 This book contains works on mathematical and simulation modeling of processes in various domains ecology and geographic information systems IT industry and project management The development of complex multicomponent systems requires an increase in accuracy

efficiency and adequacy while reducing the cost of their creation The studies presented in the book are useful to specialists who involved in the development of real events models analog management and decision making models production models and software products Scientists can get acquainted with the latest research in various decisions proposed by leading scholars and identify promising directions for solving complex scientific and practical problems The chapters of this book contain the contributions presented on the 16th International Scientific practical Conference MODS June 28 July 01 2021 Chernihiv Ukraine Mathematical Methods for Engineering Applications Fatih Yilmaz, Araceli Queiruga-Dios, Jesús Martín Vaquero, Ion Mierluș-Mazilu, Deolinda Rasteiro, Víctor Gayoso Martínez, 2023-03-08 This proceedings volume convenes selected peer reviewed papers presented at the 3rd International Conference on Mathematics and its Applications in Science and Engineering ICMASE 2022 which was held on July 4 7 2022 by the Technical University of Civil Engineering of Bucharest Romania Works in this volume cover new developments in applications of mathematics in science and engineering with emphasis on mathematical and computational modeling of real world problems Topics range from the use of differential equations to model mechanical structures to the employ of number theory in the development of information security and cryptography Educational issues specific to the acquisition of mathematical competencies by engineering and science students at all university levels are also touched on Researchers and university students are the natural audiences for this book which can be equally appealing to practitioners seeking up to date techniques in mathematical applications to different contexts and disciplines **Handbook of International Research in Mathematics Education** Lyn D. English, David Kirshner, 2015-07-30 This third edition of the Handbook of International Research in Mathematics Education provides a comprehensive overview of the most recent theoretical and practical developments in the field of mathematics education Authored by an array of internationally recognized scholars and edited by Lyn English and David Kirshner this collection brings together overviews and advances in mathematics education research spanning established and emerging topics diverse workplace and school environments and globally representative research priorities New perspectives are presented on a range of critical topics including embodied learning the theory practice divide new developments in the early years educating future mathematics education professors problem solving in a 21st century curriculum culture and mathematics learning complex systems critical analysis of design based research multimodal technologies and e textbooks Comprised of 12 revised and 17 new chapters this edition extends the Handbook s original themes for international research in mathematics education and remains in the process a definitive resource for the field *Smart Computing Techniques and Applications* Suresh Chandra Satapathy, Vikrant Bhateja, Margarita N. Favorskaya, T. Adilakshmi, 2021-07-13 This book presents best selected papers presented at the 4th International Conference on Smart Computing and Informatics SCI 2020 held at the Department of Computer Science and Engineering Vasavi College of Engineering Autonomous Hyderabad Telangana India It presents advanced and multi disciplinary research towards the design of smart computing and informatics

The theme is on a broader front which focuses on various innovation paradigms in system knowledge intelligence and sustainability that may be applied to provide realistic solutions to varied problems in society environment and industries The scope is also extended towards the deployment of emerging computational and knowledge transfer approaches optimizing solutions in various disciplines of science technology and health care *Вестник МГСУ №10 2014*, 2017-04-29 2005 05 23 00 05 02 00 05 13 00 05 26 00 08 00 00 c *Intelligent Systems Technologies and Applications 2016* Juan Manuel Corchado Rodriguez, Sushmita Mitra, Sabu M. Thampi, El-Sayed El-Alfy, 2016-09-19 This book constitutes the thoroughly refereed proceedings of the second International Symposium on Intelligent Systems Technologies and Applications ISTA 16 held on September 21 24 2016 in Jaipur India The 80 revised papers presented were carefully reviewed and selected from 210 initial submissions and are organized in topical sections on image processing and artificial vision computer networks and distributed systems intelligent tools and techniques and applications using intelligent techniques *Fundamentals of Water Pollution* Daniel A. Vallero, 2024-09-27 *Water Pollution Calculations Quantifying Pollutant Formation Transport Transformation Fate and Risks* provides a comprehensive collection of relevant real world water pollution calculations The book's author explains in detail how to measure and assess risks to human populations and ecosystems exposed to water pollutants The text covers water pollution from a multivariate systems approach bringing in hydrogeological climatological meteorological processes health and ecological impacts and water and wastewater treatment and prevention After first reviewing the physics chemistry and biology of water pollution the author explores both groundwater and surface waters This is followed by an in depth look at water quality indicators measurements models and water engineering Groundwater remediation risk assessment and green engineering round out the text with forward thinking ideas towards sustainability This invaluable reference offers a practical tool for those needing a precise and applicable understanding of different types of water pollution calculations Includes applications of theory to real world problems with personalized and customized examples of calculations to prepare exams guidance documents and correspondence Walkthroughs and derivation of equations enhance knowledge so that complex water pollution concepts can be more easily grasped Explains processes and mechanisms providing an understanding of how pollutants are formed transported transformed deposited and stored in the environment *Control of Distributed Parameter Systems 1982* Jean-Pierre Babary, Laurent Le Letty, 2014-05-16 *Control of Distributed Parameter Systems 1982* covers the proceeding of the Third International Federation of Automatic Control IFAC Symposium on Control of Distributed Parameter Systems The book reviews papers that tackle issues concerning the control of distributed parameter systems such as modeling identification estimation stabilization optimization and energy system The topics that the book tackles include notes on optimal and estimation result of nonlinear systems approximation of the parameter identification problem in distributed parameters systems and optimal control of a punctually located heat source This text also encompasses the stabilization of nonlinear parabolic equations and the decoupling approach to the control of

large spaceborne antenna systems Stability of Hilbert space contraction semigroups and the tracking problem in the fractional representation approach are also discussed This book will be of great interest to researchers and professionals whose work concerns automated control systems      Artificial intelligence and education Wayne Holmes,Jen Persson,Irene-Angelica Chounta,Barbara Wasson,Vania Dimitrova,2022-11-30 Ensuring that AI empowers educators and learners not over empowers them and that future developments and practices are truly for the common good Artificial intelligence AI is increasingly having an impact on education bringing opportunities as well as numerous challenges These observations were noted by the Council of Europe s Committee of Ministers in 2019 and led to the commissioning of this report which sets out to examine the connections between AI and education AI and it provides a critical analysis of the academic evidence and the myths and hype The Covid 19 pandemic school shutdowns triggered a rushed adoption of educational technology which increasingly includes AI assisted classrooms tools AIED This AIED which by definition is designed to influence child development also impacts on critical issues such as privacy agency and human dignity all of which are yet to be fully explored and addressed But AI ED is not only about teaching and learning with AI but also teaching and learning about AI AI literacy addressing both the technological dimension and the often forgotten human dimension of AI The report concludes with a provisional needs analysis the aim being to stimulate further critical debate by the Council of Europe s member states and other stakeholders and to ensure that education systems respond both proactively and effectively to the numerous opportunities and challenges introduced by AI ED      *Computer Assisted Learning* M.R. Kibby,J.R. Hartley,2014-05-23 This volume contains a selection of the best papers from the Computer Assisted Learning 91 Symposium It includes research on a wide range of topics related to computers and learning with an emphasis on hard research evidence and innovative explorations      **Computability, Complexity, and Languages** Martin D. Davis,Elaine J. Weyuker,2014-05-10 Computability Complexity and Languages Fundamentals of Theoretical Computer Science provides an introduction to the various aspects of theoretical computer science Theoretical computer science is the mathematical study of models of computation This text is composed of five parts encompassing 17 chapters and begins with an introduction to the use of proofs in mathematics and the development of computability theory in the context of an extremely simple abstract programming language The succeeding parts demonstrate the performance of abstract programming language using a macro expansion technique along with presentations of the regular and context free languages Other parts deal with the aspects of logic that are important for computer science and the important theory of computational complexity as well as the theory of NP completeness The closing part introduces the advanced recursion and polynomial time computability theories including the priority constructions for recursively enumerable Turing degrees This book is intended primarily for undergraduate and graduate mathematics students      Proceedings of the Fourteenth Annual Conference of the Cognitive Science Society Cognitive Science Society (US) Conference,2014-05-12 This volume features the complete text of all regular papers posters
