Public Welfare, 1956 **The Vessel** Russell Nohelty, 2019-07-16 A million years ago the world ended Since then a group of five have kept the City running Now one of them has died Every generation the five most powerful people in the City transfer their consciousnesses into nubile teenage hosts This allows them to continue their important work of keeping the city functioning and protected from the nuclear wasteland beyond its borders When one of the Five dies though the others decide that their bodies are too fragile and decide to find new hosts earlier than usual This triggers a competition where children from across the City travel to its center to compete for a chance to earn a place as a Vessel for one of the Five If chosen their families will be taken care of for the rest of eternity There is great prestige in being a Vessel along with enormous wealth for the families of the chosen which means every participant has their own motivations for competing Althea is one of those competitors She is from a poor farming family on the outskirts of the City and with the money she receives from her sacrifice her family would never have to work again She is willing to risk her life for them So she decides to compete traveling from her home in the outer rings through the inner rings and finally to the center where the competition is held Along the way she discovers the City she once venerated is a more dangerous place than she ever thought possible Every turn is fraught with peril and the competition could be the death of her even if she doesn't win Join Althea for a story of friendship love struggle and perseverance in the face of enormous odds Perfect for anybody who loved Divergent The Hunger Games or The Maze Runner Get it now **The Venus Project: A Post Apocalyptic Sci-Fi** Ilker Korkutlar, 2023-04-18 Derin Kaplan was only six

years old when her father was frozen and a lot has changed in the world since then The financial markets crashed with the interventions of a quantum computer built by her father and biological weapons killed most of the global population Derin and her mother survived and live in a female only community in a high tech building rising above the sea The year is 2044 and as a cryogenic engineer Derin is working day and night to bring her father back to life If he does come back he will be three years younger than her but what will that change He ll still be her father She remembers his face from old videos and she s programmed her personal robot to speak with his voice She misses him Her mother is asking her to think this through more but Derin is determined She manages to freeze and thaw one of the hamsters she s been experimenting with but one is still dead There must have been a difference somewhere in the process but she can t find it She needs to ask Quantus the community s AI No one else can help her She won t give up even if bringing her father back means that two of the women who have applied for a baby this year will be turned down due to the community s restrictions on population growth The system is very different from the approaches of the past unanimity is required in voting not just a majority She must prepare a speech and convince the other women to vote in favor of bringing her father back However when her own life and the fate of the whole community are threatened by artificial intelligence Derin begins to question everything she thought she knew Her questions will lead her into outer space in pursuit of a mysterious object that appears and disappears in the sky and the answers that she finds will show her how humanity came to be on Earth and how they should live from this point forward Derin s story is interspersed with those of several other interconnected characters with action taking place both before and after the crises that bring about the collapse of the old world order
