Learning to see (better): improving visual deficits with perceptual learning Gianluca Campana, Marcello Maniglia, 2015-07-09 Perceptual learning can be defined as a long lasting improvement in a perceptual skill following a systematic training due to changes in brain plasticity at the level of sensory or perceptual areas Its efficacy has been reported for a number of visual tasks such as detection or discrimination of visual gratings De Valois 1977 Fiorentini Mayer 1983 motion direction discrimination Ball Ball Sekuler Shiu Vogels Bennett Fahle 1997 Fahle Kumar McKee Saarinen Casco Campana Campana Ellison Sireteanu Karni 1993 Saarinen Pourtois et al 2008 and extrastriate Ahissar Levi 2005 Levi Zhou et al 2006 myopia Tan Polat et al 2004 Polat 2009 Tan Fong 2008 More recently Maniglia et al 2011 perceptual learning with the lateral interactions paradigm has been successfully used for improving peripheral vision in normal people by improving contrast sensitivity and reducing crowding the interference in target discrimination due to the presence of close elements offering fascinating new perspectives in the rehabilitation of people who suffer of central vision loss such as maculopathy patients partially overcoming the structural differences between fovea and periphery that limit the vision outside the fovea One of the strongest point and a distinguishing feature of perceptual learning is that it does not just improve the subject s performance but produces changes in brain s connectivity and efficiency resulting in long lasting enduring neural changes By tailoring the paradigms on each subject s needs perceptual learning could become the treatment of choice for the rehabilitation of visual functions emerging as a simple procedure that doesn t need expensive equipment *New Frontiers in Teaching and Learning English* Paola Vettorel, 2015-06-18 The contributions to this volume explore several focal issues related to the global spread of English and their implications for English language teaching providing both theoretical and empirical perspectives on recent research and implications in educational terms The volume is divided into three thematic sections namely Developments in ELF research and pedagogic implications Raising teachers awareness of ELF and ELF and ELT practices The book provides up to date perspectives on the issues implications and repercussions that findings in ELF research can have for ELT practices The contributors are all scholars and researchers who have long been engaged in ELF related research and who have undertaken operational and practical work in the field and as such offer novel perspectives on the effects of EFL research on the teaching and learning of English The volume also presents the findings of innovative projects in teacher education involving pre and in service teachers providing exemplificative good practices of possible new routes into pluralistic ELF aware and ELF oriented didactic perspectives **ICPMG2014 - Physical Modelling in Geotechnics** Christophe Gaudin, David White, 2019-01-08 The 8th International Conference on Physical Modelling in Geotechnics ICPMG2014 was organised by the Centre for Offshore Foundation Systems at the University of Western Australia under the auspices of the Technical Committee 104 for Physical Modelling in Geotechnics of the International Society of Soil Mechanics and Geotechnical Engineering This quadrennial conference is the traditional focal point for the

processing and interaction *Hierarchical Object Representations in the Visual Cortex and Computer Vision* Antonio Rodríguez-Sánchez, Mazyar Fallah, Ales Leonardis, 2016-06-08 Over the past 40 years neurobiology and computational neuroscience has proved that deeper understanding of visual processes in humans and non human primates can lead to important advancements in computational perception theories and systems One of the main difficulties that arises when designing automatic vision systems is developing a mechanism that can recognize or simply find an object when faced with all the possible variations that may occur in a natural scene with the ease of the primate visual system The area of the brain in primates that is dedicated at analyzing visual information is the visual cortex The visual cortex performs a wide variety of complex tasks by means of simple operations These seemingly simple operations are applied to several layers of neurons organized into a hierarchy the layers representing increasingly complex abstract intermediate processing stages In this Research Topic we propose to bring together current efforts in neurophysiology and computer vision in order 1 To understand how the visual cortex encodes an object from a starting point where neurons respond to lines bars or edges to the representation of an object at the top of the hierarchy that is invariant to illumination size location viewpoint rotation and robust to occlusions and clutter and 2 How the design of automatic vision systems benefit from that knowledge to get closer to human accuracy efficiency and robustness to variations **Genetic and Evolutionary Computing** Jeng-Shyang Pan, Pavel Krömer, Václav Snášel, 2013-08-04 Genetic and Evolutionary Computing This volume of Advances in Intelligent Systems and Computing contains accepted papers presented at ICGEC 2013 the 7th International Conference on Genetic and Evolutionary Computing The conference this year was technically co sponsored by The Waseda University in Japan Kaohsiung University of Applied Science in Taiwan and VSB Technical University of Ostrava ICGEC 2013 was held in Prague Czech Republic Prague is one of the most beautiful cities in the world whose magical atmosphere has been shaped over ten centuries Places of the greatest tourist interest are on the Royal Route running from the Powder Tower through Celetna Street to Old Town Square then across Charles Bridge through the Lesser Town up to the Hradcany Castle One should not miss the Jewish Town and the National Gallery with its fine collection of Czech Gothic art collection of old European art and a beautiful collection of French art The conference was intended as an international forum for the researchers and professionals in all areas of genetic and evolutionary computing The main topics of ICGEC 2013 included Intelligent Computing Evolutionary Computing Genetic Computing and Grid Computing *Creating Effective Blended Language Learning Courses* Daria Mizza, Fernando Rubio, 2020-10-01 Blended language courses which combine face to face and online instruction are becoming increasingly popular due to the need for more flexible yet effective learning opportunities This book recognizes the associated opportunities and challenges for teachers and provides the rationale strategies and tools to design blended learning courses or to guide the transition from fully face to face or fully online courses to blended instruction The authors propose a framework based on four phases Design Build Teach and Evaluate which facilitates a systematic approach

to course development The volume simplifies the connection between theory and practice by including examples that readers can relate to and immediately implement as they build or teach a course Including case studies of successful implementations and effective instructional strategies and techniques this book is accessible even for teachers without previous experience in course design whilst also acting as a reference for more experienced language educators
