Computers and Society in the Past Half Century Abbe Mowshowitz,2024-04-17 Almost fifty years ago the author wrote the first comprehensive critical study of social issues in computing *The Conquest of Will* 1976 This new book revisits this seminal study featuring an overview of technological advances over the past half century and provides a unique comparison between what was believed and expected of computers back in 1976 and actual outcomes up to the present time Despite the extraordinary changes in technology much of what has emerged in contemporary society was anticipated fifty years ago and we are still grappling with some of the same basic challenges For example the computer s threat to privacy has been a constant issue ever since the late 1950s but the regulatory framework designed in the 1960s has been upended by the Internet Artificial Intelligence too has been a contentious issue since the late 1950s but until recently discussion was largely confined to academia and there was little urgency to regulate its further development and application The comparisons offered in this book will highlight what we got right and wrong in the past and point to the sources of good and bad predictions While there have been many studies of social issues in computing published since *The Conquest of Will* appeared in 1976 this is an unusual and valuable longitudinal comparison of the current situation with what prevailed and was predicted half a century ago *Saturday Review* ,1866 *Grace Period* Robert Hammond,2007-04 Seeking freedom love and easy money Abel Adams discovers a dark world of delusion drugs and self destruction His journey leads him through a labyrinth of crime cults and incarceration Will Abel find deliverance before time runs out **Applied Sport Management Skills** Robert N. Phenomenology of Broken Habits Line Ryberg Ingerslev, Karl Mertens, 2024-07-12 This volume explores the phenomenology of broken habits and their affective social and involuntary dimensions It shows how disruptive experiences impact self understanding and social embeddedness The chapters in this volume investigate the epistemic and existential relevance of breakdown of habits and the corresponding kinds of self understanding available to the agent The first part focuses on the double sidedness of habitual life On the one hand habits allow us to arrange and navigate in a familiar home world on the other hand habits can take hold of us in such a way that we lose our sense of autonomy The contributors argue that habitual agency is structurally carried by a dynamic that entails both freedom and necessity As habits enable us to inhabit and thus acquire a world they also affectively provide a

texture and a background for our feeling at home in the world The chapters in Part 2 focus on the breakdowns of our habitual social and technological life forms and the phenomenology of their affective texture History and habitual learning are sedimented in our body memory and in our language and these sedimented layers are partly out of our direct control Part 3 focuses on the structural openness of habits in relating to one's past and one's traumatic experiences Part 4 reflects on the ways in which we might become aware of and thus transform or appropriate our culturally given habits Phenomenology of Broken Habits will appeal to researchers and advanced students working in phenomenology philosophy of mind and philosophy of psychology **The English Catalogue of Books Published from January, 1835, to January, 1863**, 1864
