Back up. Protect your Existing Data

Periodic backup of important data is always a good idea. Whenever your computer is on, there is the potential for losing data on your hard drive. This is especially true when running disk utilities or any software that directly manipulates your files.

Maxtor recommends that you make a backup copy of the files on any existing hard drives prior to installing the new drive. If required, this data may then be copied to the Maxtor hard drive after it has been installed in the computer. Refer to your computer user's manual for detailed data backup instructions.

Pre-installation Notes

If you do not understand the steps outlined in this Installation Guide, please have a qualified computer technician install the hard drive.

Handling Precautions

If the handling precautions are not followed, damage to the hard drive may result – which may void your warranty. See the Warranty section for additional information.

Allow the drive to reach room temperature **BEFORE** installing it in the computer.

Hard drives are sensitive to electrostatic discharge (ESD) damage. Handle the drive by its sides. **DO NOT** touch the printed circuit board assembly.

NEVER drop, jar, or bump the drive.

DON'T connect/disconnect any drive cables when the power is on.

DON'T force or rock the hard drive connectors into or out of their connection sockets.
