How to Establish a Document Control System for Compliance with ISO 9001:2015, ISO 13485:2016, and FDA Requirements Stephanie L. Skipper, 2015-10-12 This book explains the requirements for compliance with FDA regulations and ISO standards 9001, 13485 for documented information controls and presents a methodology for compliance. The document control system (DCS) or documented information control system (DICS) is the foundation of a quality management system. It is the first quality system element that must be implemented because the establishment and control of documented processes and information in a quality controlled environment is dependent on the ability to proactively manage access to documents and the movement of documents through the document life cycle. A well developed document control system benefits business by: Improving knowledge retention and knowledge transfer within and across business units; Improving access to knowledge based information; Improving employee performance by providing standardized processes and communicating clear expectations; Improving customer communication and satisfaction by providing documented information from which common understanding can be achieved; Providing traceability of activities and documentation throughout the organization; Improving organization of and access to documents and data. Sample documents are included in the appendixes of this book to help clarify explanations. This book provides a process based approach that can be used for controlling all forms of documented information that are required to be managed under the quality management system. *Data Management in Large-Scale Education Research* Crystal Lewis, 2024-07-09 Research data management is becoming more complicated.
