November 2013 Paper 3 A Level Economics Zimsec

Catherine Boone

November 2013 Paper 3 A Level Economics Zimsec:

Beyond the Crises: Zimbabwe's Prospects for Transformation Tendai Murisa, Tendai Chikweche, 2015-12-01 Over the past years few African countries have been the focus of discussions and analyses generating a vast array of literature as much as Zimbabwe. The socioeconomic and political crises since the turn of the century have deeply transformed the country from the ideals of a vibrant freshly independent nation just two decades earlier. These transformations have necessitated the call for the restructuring of Zimbabwean society, polity and economy. But this literature remains exclusively within the realm of academic thinking and theorising with no concerted effort to move beyond this by explicitly drawing out the policy implications. Beyond the Crises: Zimbabwe's Prospects for Transformation is a welcome addition to the academic and policy literature with a much broader and all embracing focus in terms of policy interventions. By focusing on different aspects of social and economic justice, Murisa and Chikweche go beyond initiating a broad discussion on these two key pillars of human development with a view to suggesting possible future directions of practical solutions and policy development for the attainment of inclusive social and economic justice for Zimbabweans.

Labour, Employment and Economic Growth K. V. Ramaswamy, 2015-05-21 Discusses some key aspects in the interrelated areas of economic development, employment and structural change.

The Cost of Free Money Paola Subacchi, 2020-09-15 A penetrating account of how unchecked capital mobility is damaging international cooperation, polarizing the economic landscape and ultimately reshaping the global order. When it comes to the afflictions of the global economy, almost everyone and especially Donald Trump is quick to point the finger of blame at the state of international trade. But what about unconstrained capital flows? Unfettered capital has resulted in a string of financial and economic crises that have left our political systems strained and dialogue corroded. The once perceived benefits of openness have been cast to the wayside and the cracks in the global order can no longer be ignored. Paola Subacchi argues that international cooperation and interdependence have become crippled. Regional restrictions will soon strengthen and a multipolar order will take shape, leading to a distinctly transformed economic landscape in which China challenges the dominance of the US dollar. Combining history, analysis and prediction, this book provides penetrating insight into the challenges facing the international economic order.

Inequality and Political Cleavage in Africa Catherine Boone, 2024-04-25 Extensive data maps and case histories show how competition between rich and poor regions drives African politics, not ethnic diversity.

System John R. Campbell,2016-12-01 The central concern of this book is to find answers to fundamental questions about the British asylum system and how it operates Based on ethnographic research over a two year period the work follows and analyses numerous asylum appeals through the British courts It draws on myriad interviews with individuals and a thorough examination of many state and non state organizations to understand how the system works While the organization of the book reflects the formal asylum process a focus on specific legal appeals reveals the political factors at play as different institutions and actors seek to influence judicial decision making and overturn uphold official asylum policy The final chapter draws on the author s ethnographic findings of the UK s asylum field to re examine research on the Refugee Determination System in the US Canada and Australia which has narrowly focused on judicial decision making It argues that analysis of Refugee Determination Systems must be situated and studied as part of a wider political semi autonomous asylum field which needs to be better understood Providing an in depth ethnographic study of a national asylum system and of immigration law and practice the book will be an invaluable resource for academics researchers and policy makers in the UK and beyond working in this highly topical area *Minding the Gap* Pamela Aall,Chester A. Crocker,2016-10-17 The prevailing narrative on Africa is that it is awash with violent conflict Indeed it does suffer from a multitude of conflicts from border skirmishes to civil wars to terrorist attacks Conflicts in Africa are diverse and complex but there have been a number of cases of successful conflict management and resolution What accounts for the successes and failures and what can we learn from Africa s experience *Minding the Gap* African Conflict Management in a Time of Change takes on these questions bringing together more than 20 experts to examine the source of conflicts in Africa and assess African management capacity in the face of these conflicts **African Governance Report III 2013** ,2013 The African Governance Report the most comprehensive report on governance in Africa assesses and monitors the progress of African countries on governance identifies capacity gaps in governance institutions and proposes policies and strategic interventions to improve governance on the continent This third edition of the Report while continuing to monitor governance trends adopts a thematic approach elections and the management of diversity in Africa Elections are central to democratic governance and the political management of diversity in plural societies While elections are held with greater regularity in Africa their content and quality remains suspect in many countries with Africa s rich diversity deployed as a combustive tool in electoral conflicts Elections have often triggered conflict with violence tensions acrimonies and sharp elite divisions surrounding electoral processes and outcomes a worrying trend for Africa s democratic future The Report investigates elections in the face of managing diversity in Africa It

recommends major electoral institutional political and constitutional reforms to enable elections to facilitate the democratic management of diversity while significantly improving their quality and credibility These include reform of the party system to make it more inclusive and democratic a move to more proportional electoral systems and an increase in the autonomy and effectiveness of election management boards The Report argues that regional and subregional initiatives and frameworks for elections democracy and governance have to be implemented and monitored to improve electoral performance and promote democratic consolidation and stability Page 4 of cover

The Oxford Handbook of Africa and Economics Célestin Monga, Justin Yifu Lin, 2015-07-02 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world In collecting some of the most authoritative statements about the science of economics and its concepts in the African context this handbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge Wide ranging in its scope themes language and approaches this volume explores examines and assesses economic thinking on Africa and Africa's contribution to the discipline The editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers political scientists and anthropologists

Poverty and Development in China Caizhen Lu,2013-03-01 China has made huge economic strides in recent decades but poverty is still a major issue on the agenda for rural China Poverty and Development in China analyses how poverty is recognized and measured and how people in poverty are identified literally asking who is poor in China Lu Caizhen s research compares four approaches to poverty assessment China s official poverty identification method the participatory approach to poverty assessment the monetary approach and use of multidimensional poverty indicators Each of these is applied to the same population of households to identify the poor in rural Wuding County Yunnan Province The analysis shows that there is in fact very little overlap of households identified as poor by the various means and that choice of approach does matter in the outcome of who is identified as poor This has implications at the theoretical methodological and policy levels Lu discusses these in detail concluding that at present there is a need to shift away from poverty reduction strategies that narrowly emphasize income generation activities as these are often short term efforts Instead the focus should move towards a broader combination of short term and long term strategies to break poverty s inter linked structural causes
