Oracle Cloud Infrastructure - A Guide to Building Cloud Native Applications Jeevan Gheevarghese Joseph, Adao Oliveira Junior, Mickey Boxell, 2023-12-06 Oracle Cloud Infrastructure A Guide to Building Cloud Native Applications Cloud native development is a modern approach to designing building deploying and managing applications This approach takes advantage of the benefits of utility computing from providers such as Oracle Cloud Infrastructure OCI and emphasizes automation elasticity and resilience OCI is a next generation cloud designed to run any application faster and more securely for less It includes the tools used to build new cloud native applications and to run existing enterprise applications without rearchitecting them Whether you are new to the cloud or just new to OCI this book provides an overview of the OCI services needed to build cloud native applications You will learn OCI concepts and terminology How to manage Infrastructure as Code using modern tools and platforms OCI s breadth of cloud native services How to operate the managed Kubernetes service Container Engine for Kubernetes at scale How to configure a cluster for advanced use cases and use specialized hardware capabilities How to use cloud native application deployment platforms and observability tools How to secure applications data and the underlying infrastructure using open source and OCI native security tools and processes The culmination of the book is an open source sample application composed of microservices that incorporates the tools and concepts shared throughout the book and is available on GitHub

Thermal Ionization Mass Spectrometry (TIMS) Akio Makishima, 2015-12-23 This first book to discuss both separation chemistry and mass spectrometry for mineral and rock analysis compares the two frequently used techniques analyzing both their scope and limitations by way of numerous practical examples The excellent and highly experienced author adopts a comprehensive and systematic approach reviewing all the steps involved in an analytical workflow In addition to thermal ionization mass spectrometry TIMS he also discusses applications of ICP MS Furthermore alongside detailed protocols on sample preparation and mass spectrometric measurements numerous practical hints are given A must have handy guide for all isotope geochemists and anyone involved in isotope analysis

Recombinant Proteins from Plants Charles Cunningham, Andrew J. R. Porter, 2008-02-05 Recombinant Proteins from Plants is one of the most exciting and fastest developing areas in biology The latest molecular techniques are being applied to the exploitation of plants as novel expression systems for the p duction and overproduction of heterologous and native proteins Transgenic plant technology is currently used in three broad areas the expression of combinant proteins to improve crop quality by increasing disease pest res tance or increasing tolerance to stress optimizing plant productivity and yield by the genetic manipulation of metabolic pathways and the large scale co effective production of recombinant proteins for use as specialist industrial or therapeutic biomolecules The intention of Recombinant Proteins from Plants is to provide c prehensive and detailed protocols covering all the latest molecular approaches Because the production oftransgenic plants has become routine in many la ratories coverage is also given to some of the more classical approaches to

the separation analysis and characterization of recombinant proteins The book also includes areas of research that we believe will become increasingly important in the near future efficient transformation of monocots with *Agrobacterium* optimizing the stability of recombinant proteins and a section highlighting the immunotherapeutic potential of plant expressed proteins *Optical Neural Interfaces* Massimo De Vittorio, Ferruccio Pisanello, John A.
