Reforming the Reform Susan L. Moffitt, Michaela Krug O'Neill, David K. Cohen, 2023-08-18 School reforms are almost always born out of big dreams and a well meaning desire to change the status quo the American education system as we know it was the product of such a reform But between the lawmakers who spearhead these changes and the students whose education is at stake there are countless teachers principals administrators and local politicians and correspondingly countless ways that things can go sideways In *Reforming the Reform* political scientist Susan Moffitt education scholar Michaela O'Neill and the late policy and education scholar David K Cohen take on a wide ranging examination of the nitty gritty of school reform They focus especially on mezzo level actors but the countless school superintendents principals and teachers figuring out how to apply a new policy in the unique context of their district or school They conducted more than 250 interviews with mezzo level administrators in Tennessee and California chosen as contrasts for their different political makeup and centralization of the education system between 2016 and 2020 ending their data collection as schools were going virtual at the beginning of the pandemic They also collected survey data from across the US Finally they turned to archival data dating to the earliest American educational reform the creation of a centralized national education policy Taken together this data demonstrates an impressive ambition to identify common problems that arise when a general policy is implemented in a local context The framework provides a general explanation for problems facing social policy reforms in federalist systems including healthcare and offers pathways forward for education policy in particular

Base-1 method: A structural-functional approach to word, sentence and discourse readability Bernd Nuss, 2018 Text readability is at the core of successful reading instruction and language learning To counteract the challenges of complex reading content text leveling is a vital necessity for readers with limited language access A transdisciplinary analysis of reading development and linguistic interrelations builds the theoretical

foundation of the base 1 method This method focuses solely on structural and functional text elements on the word sentence and cohesion level But this book also discusses the significance of other prevalent readability factors such as the reader s language knowledge or socio cultural background The base 1 method is designed to level early reading texts in German and other alphabetic languages Experimental tests with a German immersion population has led to a preliminary calibration to demonstrate the validity of this approach Bernd Nuss ist erfahrener Immersionslehrer in verschiedenen Programmen die sich über Nord Zentral und Südamerika erstrecken An der E E Waddell Language Academy wirkt er schulintern als Immersion Facilitator kooperiert mit Bildungsorganisationen und betreut die Praktika von Gaststudierenden an der Schule Bernd Nuss has worked as an educator and facilitator in English and German language immersion programs all over the Americas and in Europe In this capacity he has also been collaborating as a researcher with universities and other educational institutions in Europe Asia and the USA

Integrating Human Factors Methods and Systems Thinking for Transport Analysis and Design Gemma J. M. Read, Vanessa Beanland, Michael G. Lenné, Neville A. Stanton, Paul M. Salmon, 2017-07-26 Governments and road safety agencies around the world have either introduced or are considering safe system strategies a long overdue acknowledgement that different elements of the road system contribute to road safety outcomes Human factors approaches have a leading role here in both conceptualising the road system as a complex sociotechnical system and in providing practical approaches to support true systems based countermeasures This book illustrates the potential for integrating contemporary systems based human factors methods with modern day driving assessment methods such as vehicle instrumentation and driving simulation to understand and enhance performance in modern day road transport systems The book outlines why a fundamental paradigm shift is needed in the way these systems are designed and operated and illustrates how a wide range of accepted human factors approaches can be applied successfully to road transport to revolutionise the countermeasure design process The practical illustrations of these human factors methods are applied to a long standing road and rail safety issue rail level crossings where the road and rail systems intersect The final chapter of the book highlights the utility of the human factors approach to reducing road trauma and discusses future applications of the approach

The Power of Truth Focus Apostle Jesse Duckworth Jr., 2013-06-14 We cannot succeed at any thing in life without the natural ability to focus There is no purpose there is no real success without this innate ability you were born with called focus There would be no technological human successes in this world continuously without focus However this is an unbalanced world and as a result so is our natural focused reality This is not the way God designed this world to focus Picture your natural focus being changed to a focus from another perspective by becoming the principled person God designed you to become This can happen no matter what your disposition is right now through The Power of Truth Focus

Roebbers, Stephanie M. Carlson, Loren Marulis, 2025-03-24 Metacognitive skills thinking about thinking are a form of abstract thought that signify a major advance in cognition in both phylogeny and ontogeny Metacognition is associated with a host of positive outcomes including academic achievement and mental health Although decades of research have led to discoveries about the nature and development of metacognition in school age children newer approaches suggest there are precursor skills in infancy and early childhood Investigators also are turning toward experimental and field based intervention studies to help foster metacognition in the service of learning and to reduce socioeconomic achievement gaps **Whose Knowledge Counts in Government Literacy Policies?** Kenneth S. Goodman, Robert C. Calfee, Yetta M. Goodman, 2013-10-01 Accountability in the form of standardized test scores is built into many government literacy policies with severe consequences for schools and districts that fail to meet ever increasing performance levels The key question this book addresses is whose knowledge is considered in framing government literacy policies The intent is to raise awareness of the degree to which expertise is being ignored on a worldwide level and pseudo science is becoming the basis for literacy policies and laws The authors all leading researchers from the U S U K Scotland France and Germany have a wide range of views but share in common a deep concern about the lack of respect for knowledge among policy makers Each author comes to the common subject of this volume from the vantage point of his or her major interests ranging from an exposition of what should be the best knowledge utilized in an aspect of literacy education policy to how political decisions are impacting literacy policy to laying out the history of events in their own country Collectively they offer a critical analysis of the condition of literacy education past and present and suggest alternative courses of action for the future **The Street**

railway journal ,1895 **New York Court of Appeals. Records and Briefs.** New York (State)., Model Selection and Inference Kenneth P. Burnham,David R. Anderson,2013-11-11 We wrote this book to introduce graduate students and research workers in various scientific disciplines to the use of information theoretic approaches in the analysis of empirical data In its fully developed form the information theoretic approach allows inference based on more than one model including estimates of unconditional precision in its initial form it is useful in selecting a best model and ranking the remaining models We believe that often the critical issue in data analysis is the selection of a good approximating model that best represents the inference supported by the data an estimated best approximating model Information theory includes the well known Kullback Leibler distance between two models actually probability distributions and this represents a fundamental quantity in science In 1973 Hirotugu Akaike derived an estimator of the relative Kullback Leibler distance based on Fisher's maximized log likelihood His measure now called Akaike's information criterion AIC provided a new paradigm for model selection in the analysis of empirical data His approach with a fundamental link to information theory is relatively simple and easy to use in practice but little taught in statistics classes and far less understood in the applied sciences than should be the case We do not accept the notion that there is a simple true model in the biological sciences
