*Towards the Internet of Services: The THESEUS Research Program* Wolfgang Wahlster, Hans-Joachim Grallert, Stefan Wess, Hermann Friedrich, Thomas Widenka, 2014-09-01 The Internet of Services and the Internet of Things are major building blocks of the Future Internet The digital enterprise of the future is based not only on mobile social and cloud technologies but also on semantic technologies and the future Internet of Everything Semantic technologies now enable mass customization for the delivery of goods and services that meet individual customer needs and tastes with near mass production efficiency and reliability This is creating a competitive advantage in the industrial economy the service economy and the emerging data economy leading to smart products smart services and smart data all adaptable to specific tasks locations situations and contexts of smart spaces Such technologies allow us to describe revise and adapt the characteristics functions processes and usage patterns of customization targets on the basis of machine understandable content representation that enables automated processing and information sharing between human and software agents This book explains the principal achievements of the Theseus research program one of the central programs in the German government s Digital 2015 initiative and its High Tech Strategy 2020 The methods toolsets and standards for semantic technologies developed during this program form a solid basis for the fourth industrial revolution Industrie 4 0 the hybrid service economy and the transformation of big data into useful smart data for the emerging data economy The contributing authors are leading scientists and engineers representing world class academic and industrial

research teams and the ideas technologies and representative use cases they describe in the book derive from results in multidisciplinary fields such as the Internet of Services the Semantic Web and semantic technologies knowledge management and search user interfaces multimodal interaction and visualization machine learning and data mining and business process support manufacturing automation medical systems and integrated service engineering The book will be of value to both researchers and practitioners in these domains      **Neural Nets** Maria Marinaro,Roberto
