Justice and Underserved Communities Climate Change and Underserved Communities Geriatric Care Issues An American and an International Perspective Cardiovascular Health Disparities in Underserved Populations Cancer in the Medically Underserved Population and International Comparisons in Underserved Health Issues Policies Needs and Projections CME credits are also available to subscribers of this series *New Directions in Behavioral Intervention Development for Pediatric Obesity, An Issue of Pediatric Clinics of North America* Sylvie Naar-King, 2016-07-06 Almost one out of every three US children is overweight or obese with minority youth at highest risk There are limited efficacious pediatric obesity interventions available for clinicians and successful weight loss trials for minority youth are rare Even fewer interventions have been shown to significantly improve clinical health outcomes such as adiposity blood pressure and cholesterol level and maintenance of behavior change over the long term remains a challenge Translation I research in which bench findings are applied to the bedside is uncommon in the behavioral arena Thus advances in our understanding of fundamental human processes such as motivation emotion cognition self regulation decision making stress and social networks are not being optimally applied to our most pressing behavioral health problems This issue of Pediatric Clinics will focus on promising behavioral treatments in the pipeline that have been translated from basic behavioral science and are the process of refinement and proof of concept testing **Childhood and Adolescent Obesity** Lauren A. Stutts, 2016-10-31 This book covers the development and treatment of childhood and adolescent obesity It is written from a biopsychosocial perspective and explores obesity from a holistic perspective and addresses the extent of the obesity epidemic and how obesity is defined and assessed in children It also chronicles the varying causes and contributors to childhood obesity as well as the physical psychological and social consequences of it The author highlights how a psychologist assesses childhood obesity and the potential psychological disorders related to obesity and also includes descriptions of specific interventions for childhood obesity The intervention section integrates a community based perspective that is often lacking in the literature and specifically addresses underserved populations Finally this book concludes with practical case studies discussion questions and case recommendations *Access* Dr. Amy Lee, Douglas Ramsthal CFP®, Jessica Carpenter RDN MBA, 2022-01-07 *Access* Addressing the Obesity Crisis By Dr Amy Lee Douglas Ramsthal CFP and Jessica Carpenter RDN MBA As a trained physician seeing the many types of patients in Dr Amy Lee's years of practice she has come to realize that what she does in treating a patient with obesity is a not straightforward There is not one type of diet regimen for everyone just as if there is not one pill that fixes all problems She finds herself working backwards by first meeting someone with the condition of overweightness followed by digging into their history on the root cause of the outcome What needs to be recognized is the many causes which could be genetic predisposition environmental forces complications from mental health or simply taking a medication with adverse reactions of weight gain In order for practitioners like Dr Lee to carry out this job they need the medical community as well as the ancillary services to recognize the complexity of what it takes to fully make an impact in this

patient population If they do not make changes and move forward this epidemic of obesity will surely become the next pandemic Dr Lee s hope in publishing *Access Addressing the Obesity Crisis* is to share with her colleagues the other side of the practice often overlooked or under recognized This is an attempt to shed a little light to what they are doing as medical bariatricians and the impact they can make for their patients
