Cyclopedia William Dwight Whitney, Benjamin Eli Smith, 1906 APC New Discovery - Class 2 S.C. Maheshwari, Vineeta Mittal, The early schooling years in a child's life are of extreme importance. These are the times when he focuses his eyes and mind on everything that is new and appealing. His mind is untrained and he has learned only the basics of communication. His vocabulary is limited but he is eager to learn. Whatever is presented to him he absorbs like a sponge. His attention span is short and he requires constant reinforcement. What interests him most is things and events around him. This is the golden opportunity to inculcate in him a spirit of adventure and inquiry to teach him to ask, to reason and to pick up healthy habits. With this in mind our publisher decided to bring out a science series for the junior classes **Concrete Surface**

Engineering Benoit Bissonnette, Luc Courard, Andrzej Garbacz, 2018-10-09 Applying any material to an existing concrete surface intrinsically entails the development of a bond. Considering the ever increasing importance of concrete repair and protection which imply the creation of an interface between two materials an improved knowledge of concrete surface characteristics is paramount. Surface engineering which has evolved from the world of metallurgy addresses all surface related considerations notably adhesion. It provides a fundamental understanding of what will make the contact between two materials effective or not allowing for interactions of variable intensity. It also comes with a variety of scientific tools for characterizing the quality of the substrate, the properties of the new material layer and their interface. In the case of concrete surface treatment this is especially important for achieving lasting results. This book addresses the essentials of concrete surface engineering in view of a wide variety of concrete surface treatments from protective coatings to repairs. It provides a leading edge source of information for practicing engineers, architects, repair specialists and researchers on the following topics: Surface engineering principles applied to concrete. Methods and techniques for assessing concrete surface characteristics. Fundamentals of adhesion between concrete and surface repairs treatments. Compatibility requirements for concrete surface repairs treatments. Review of surface preparation techniques available for concrete. Achievement and appraisal of bond between existing concrete and surface repairs treatments. Benoit Bissonnette is professor of civil engineering at Laval University in Quebec City, Canada. Luc Courard is professor of building materials at the University of Liège in Belgium. Andrzej Garbacz is professor of building materials engineering in the Department of Building Materials Engineering at the Warsaw University of Technology in Poland **Scientific American**, 1912 The Living Age, 1849
