Market Instruments and the Protection of Natural Resources Natalie P. Stoianoff, Larry Kreiser, Bill Butcher, Janet E. Milne, Hope Ashiabor, 2016-08-26. Only through a concerted global effort can we protect our natural resources, save our precious natural environment, and indeed our future. But pressures on natural resources come from many directions, such as overuse, mismanagement, and contamination. This much-needed book reviews and evaluates the use of market and fiscal instruments in protecting our natural resources from rural to marine environments. Market instruments that are designed to protect the global atmosphere are evaluated along with carbon instruments and environmental tax incentives. Meanwhile, consideration is given to shifting the tax burden to achieve environmentally responsible outcomes, balancing sustainable use and natural resource protection and protecting water resources.

Evaluation of Climate Change Impacts Karl W. Steininger, Martin König, Birgit Bednar-Friedl, Lukas Kranzl, Wolfgang Loibl, Franz Prettenhaler, 2015-02-26 This volume deals with the multifaceted and interdependent impacts of climate change on society from the perspective of a broad set of disciplines The main objective of the book is to assess public and private cost of climate change as far as quantifiable while taking into account the high degree of uncertainty It offers new insights for the economic assessment of a broad range of climate change impact chains at a national scale The framework presented in the book allows consistent evaluation including mutual interdependencies and macroeconomic feedback This book develops a toolbox that can be used across the many areas of climate impact and applies it to one particular country Austria

Food Security, Agricultural Policies and Economic Growth Niek Koning, 2017-04-21 Using a political economic approach supplemented with insights from human ecology this volume analyzes the long term dynamics of food security and economic growth The book begins by discussing the nature of preindustrial food crises and the changes that have occurred since the 19th century with the ascent of technical science and the fossil fuel revolution It explains how these changes improved living standards but that the realization of this improvement was usually dependent on government support for smallholder modernization The author sets out how the evolution of food security in different regions has been influenced by farm policy choices and how these choices were shaped by local societal characteristics, international relations and changing configurations in metropolitan countries Separate chapters are devoted to the interaction of this evolution with debates on food security and economic growth and with international economic policies The final chapters highlight the new challenges for global food security that will arise as traditional sources of biomass production and the more easily extractable reserves of fossil biomass become depleted or can no longer be used Overall the book emphasizes the inadequacy of current explanations with regard to these challenges It explores what is needed to ensure a sustainable future and calls for a rethinking of these issues a necessary reflection in today's unstable global political situation *Latin America and the Asian Giants* Riordan Roett, Guadalupe Paz, 2016-09-27 How an evolving relationship with China and India is changing Latin

America's political and economic dynamics In the years since China has adopted a going global strategy to promote its overseas investment expand export markets and gain much needed access to natural resources abroad Sino Latin American relations have both deepened and broadened at an unexpectedly rapid pace The main driver behind this sea change in bilateral relations has been economic complementarity with resource rich countries in Latin America exporting primary goods to the Asian giants growing market and China exporting manufactured goods back into the region In recent years Sino Latin American relations have matured considerably becoming far more nuanced and multifaceted than ever before India is a relatively new player in the region but has slowly strengthened its ties As one of Asia's largest markets it offers interesting parallels to the Chinese case Will Indo Latin American ties follow a similar path The main areas of growth include trade and investment mining energy information technology motor vehicle production and pharmaceuticals To what extent these changing dynamics will redefine Latin America's relations with India is a question of increasing relevance for policymakers This volume offers a review of key cross regional trends and critical policy issues involving the changing relationship between these two Asian giants and Latin America Selected country case studies Argentina Brazil Chile and Mexico provide a more in depth analysis of the implications of China's and India's evolving interaction with the region

Science Teaching in Schools Great Britain: Parliament: House of Lords: Science and Technology Committee, 2006-11-05 The Committee's report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14-19 year old students based on the International Baccalaureate This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers the quality of careers advice in schools and the importance of practical science in schools
