

A sewing machine, like any other piece of machinery, needs oiling to insure smooth running and to prevent wearing of parts. Use only the best oil, which you can get if your dealer cannot supply you. Poor oil will cause the machine to run hard. Avoid oil which is too thick—good oil should be about the consistency of kerosene.

If the machine is in constant use, it should be oiled daily. With moderate use, occasional oiling is sufficient. A drop of oil at each point as shown in illustration
