

Paper Example on New Look Company: Large Fashion Clothing Retailer Essay

Introduction

Retailing is the process of selling consumer goods and services to the final customers through multiple distribution channels with the aim of earning profit. The distribution channels may include the internet, home shopping, door to door shopping and store outlet among others (Cox and Dannehl, 2017). Retail typically involves a service provider filling small orders for a large number of individuals who are the final consumers rather than filling large orders for few individuals in the market such as the government, corporations, and suppliers. In the modern market, retailers come up with the product mix which entails the product, the place, price, personnel, presentation, and promotion (Mayer, Melitz and Ottaviano, 2016). This is done by coming up with a strategic plan and decisions on the type of stores, the optimal product assortment, the market to be served and the overall market position. Besides, retailers in the modern market also offer retail support services to the customers such as advisory services, stylist services and provision of credit. Therefore, the main objective of this report is to analyze the key changes in the UK fashion retail market and how they affect New Look Company's growth and development in the market. The paper will also discuss on the strategies and tactics the company can use to cope up with the changes

For example, the company has also closed a total of about 88 stores in the United Kingdom and about ten stores in Indonesia because of poor sales. Despite the challenges the company has gone through over the years, it has been able to flourish till today, and it is recognized as one of the best companies in the fashion industry in the UK and internationally (Achleitner et al., 2010).

Fundamental Relevant Changes within the UK Fashion Retail Market

The modern business environment is dynamic, and any business organization needs to understand that it has to keep updated with the changing climate for it to ensure its survival in the market (Frue, 2017). system of vocational training After decades of off shoring and downsizing that have left blue collar workers obsolete and stranded the United States is now on the verge of an industrial renaissance Companies like Apple BMW Bosch and Volkswagen are all opening plants and committing millions of dollars to build products right here on American soil The only problem we don't have a skilled enough labor pool to fill these positions which are in many cases technically demanding and require specialized skills A decades long series of idealistic educational policies with the expressed goal of getting every student to go to college has left a generation of potential workers out of the system Touted as a progressive egalitarian institution providing opportunity even to those with the greatest need the American secondary school system has in fact deepened existing inequalities leaving behind millions of youth especially those who live in the de industrialized Northeast and Midwest without much of a future at all We can do better argue acclaimed sociologists Katherine Newman and Hella Winston Taking a page from the successful experience of countries like Germany and Austria where youth unemployment is a mere 7% they call for a radical reevaluation of the idea of vocational training long discredited as an instrument of tracking The United States can prepare a new high performance labor force if we revamp our school system to value industry apprenticeship and rigorous technical education By doing so we will not only be able to meet the growing demand for skilled employees in dozens of sectors where employers decry the absence of well trained workers we will make the American Dream accessible to all
