Tiell, S. Charles Malka, 2024-03-01 How can management research promote a more applicable and a more transparent knowledge for the benefit of individuals and organizations Looming large over this question is the challenge of repurposing management research for improving public good Co edited by R H Tiell and S C Malka the title of the book says it all Amplifying management research for the common good Lessons for curious individuals and organizations Insights from practitioners in the field In this book we sought to bridge the chasm that separates the non academic audience from the typically less accessible scientific journals We attempted to make empirical evidence more inclusive impactful and public good relevant for the non academic stakeholders that live and work in the broader community For that purpose we made available to the reader and to our chapter contributors a collection of published papers some authored by the editors of this book and others co authored with other researchers The papers cover a diverse set of business topics all of which we believe hold much relevance for management today Providing the reader with their insights on subject matter along with lessons and practical recommendations we sought experts in the field that can build on empirical research in various areas of management and then synthesize and broaden it through their expertise and work experience As a trigger we aligned each contributor with one or two empirical papers based on their background interests and professional experience Using the assigned papers as a springboard we asked each author to identify emerging themes around which they can build their chapter We wanted them to think of the book audience non academicians comprised of interested and curious individuals managers and their organizations And we wanted our authors to elaborate on practical lessons suggestions and recommendations that can make a difference in the lives of the book audience Our effort resulted in a collection of chapters

covering a wide range of topics from supply chain challenges in Central America to life changing long term effects of the pandemic from delivery of services for mental health and suicide to logistics capabilities pre post Ivan in the Cayman Islands from the new workplace to labor market shortages and from new workforce service pathways and the optimization of talent to the impact of recent recessions on the youth and the unemployed and the assessment of C suit level leaders We would like to believe that the breadth of the topics covered and the amount of information being disseminated through the book chapters are meaningful practical and relevant to a wide audience of curious readers

Routledge Handbook on Labour in Construction and Human Settlements Edmundo Werna, George Ofori, 2023-12-12 Routledge Handbook on Labour in Construction and Human Settlements presents a detailed and comprehensive examination of the relationship between labour and the built environment and synergises these critical focus areas in innovative ways This unrivalled edited collection of chapters analyses problems and presents possible solutions related to the employment and conditions of workers in the construction industry It provides comprehensive coverage of the relationship between the global workforce and the built environment and is divided into four topical areas how labour and the built environment relate to development employment generation in the built environment quality of employment in the built environment and the impact of the built environment on labour in other sectors Underpinning the entire book is the

premise that the way the built environment is produced and its main products buildings cities and towns have an impact on large numbers of workers At the same time the quality of the built environment requires construction workers who are well trained and with good working conditions While cities and towns are the engines of economic growth they will not be able to fulfil their economic potential if poverty in the workforce is not addressed Those who are unemployed underemployed or work in unfavourable conditions cannot fully contribute to production and at the same time are limited in their ability to purchase goods and services therefore limiting economic growth and restricting improvements in their living standards In addition investments in infrastructure housing and inner city redevelopment cannot be sustainable if labour issues i e poverty are not addressed This book aims at analysing this complex set of issues comprehensively and will be essential reading to a wide range of researchers across the interdisciplinary intersections of construction business and management economic development urban studies sociology political science and project management New Technology (Routledge Revivals) Greg J.
