Ballano, 2015-12-26 This book addresses the persistence of the optical media piracy trade in the Philippines and Vietnam It goes beyond arguments of defective law enforcement and copyright legal systems by applying sociological perspectives to examine the socio economic forces behind the advent of piracy in the region Using documentary

and ethnographic data in addition to resistance and ecological theories in sociology of law and technology as the overall theoretical framework the book investigates factors that contribute to this phenomenon and factors that impede the full formalization of the optical media trade in the two countries These factors include the government's attitude towards the informal sector and strong resistance to tougher IPR protection unstable and sometimes conflicting policies on technologies burdensome business registration process and weak enforcement of business regulations bureaucratic corruption and loopholes in law enforcement system as well as trade ties with China In addition to that the book highlights the social background of the actors behind the illegal business of counterfeit CDs and DVDs thereby explaining the reasons they continue to persist in this type of trade It invites policymakers law enforcers advocates of anti piracy groups and the general public to use a more holistic lens in understanding the persistence of copyright piracy in developing countries shifting the blame from the moral defect of the traders to the current problematic copyright policy and enforcement structure and the difficulty of crafting effective anti piracy measures in a constantly evolving and advancing technological environment
