Soda Goes Pop Joanna K. Love, 2019-07-10 From its 1939 Nickel Nickel jingle to pathbreaking collaborations with Michael Jackson and Madonna to its pair of X Factor commercials in 2011 and 2012 Pepsi Cola has played a leading role in drawing the American pop music industry into a synergetic relationship with advertising This idea has been copied successfully by countless other brands over the years and such commercial collaboration is commonplace today but how did we get here How and why have pop music aesthetics been co-opted to benefit corporate branding What effect have Pepsi's music marketing practices in particular had on other brands the advertising industry and popular music itself Soda Goes Pop investigates these and other vital questions around the evolving relationships between popular music and corporate advertising Joanna K Love joins musical analysis historical research and cultural theory to trace parallel shifts in these industries over eight decades In addition to scholarly and industry resources she draws on first-hand accounts pop culture magazines trade press journals and other archival materials Pepsi's longevity as an influential American brand its legendary commercials and its pioneering relentless pursuit of alliances with American musical stars makes the brand a particularly instructive point of focus Several of the company's most famous ad campaigns are prime examples of the practice of redaction whereby marketers select censor and restructure musical texts

The New Autocracy Daniel Treisman,2018-02-06 Corruption fake news and the informational autocracy sustaining Putin in power After fading into the background for many years following the collapse of the Soviet Union Russia suddenly has emerged as a new threat at least in the minds of many Westerners But Western assumptions about Russia and in particular about political decision making in Russia tend to be out of date or just plain wrong Under the leadership of Vladimir Putin since 2000 Russia is neither a somewhat reduced version of the Soviet Union nor a classic police state Corruption is prevalent at all levels of government and business but Russia s leaders pursue broader and more complex goals than one would expect in a typical kleptocracy such as those in many developing countries Nor does Russia fit the standard political science model of a competitive authoritarian regime its parliament political parties and other political bodies are neither fakes to fool the West nor forums for bargaining among the elites The result of a two year collaboration between top Russian experts and Western political scholars Autocracy explores the complex roles of Russia s presidency security services parliament media and other actors The authors argue that Putin has created an informational autocracy which relies more on media manipulation than on the comprehensive repression of traditional dictatorships The fake news hackers and trolls that featured in Russia s foreign policy during the 2016 U S presidential election are also favored tools of Putin s domestic regime along with internet restrictions state television and copious in house surveys While these tactics have been successful in the short run the regime that depends on them already shows signs of age over centralization a narrowing of information flows and a reliance on informal fixers to bypass the bureaucracy The regime s challenge will be to continue to block social modernization without undermining the leadership s own capabilities
