Design for Human Flourishing Cynthia McCallister, 2022-03-28 In A Pedagogical Design for Human Flourishing Transforming Schools with the McCallister Model Cynthia McCallister presents a revolutionary paradigm for education that is practical conceptually convincing and grounded in contemporary behavioral science theory Beginning with the assertion that equality of educational opportunity depends on access to experiences that are sufficiently appropriate and rich to enable the achievement of diverse human potentials she provides a comprehensive school design for intervention that demonstrates how to achieve it Grounded in recent advances in learning science McCallister asserts three necessary conditions for learning the need for learners to have access to diverse rich environmental experiences the need for them to enjoy fundamental freedom and autonomy to direct their own learning and access to full and free forms of association In her model these conditions provide what is necessary for learners to coordinate their minds with others to develop their identities personalities and talents These conditions are animated in concrete procedures that can be adapted to a wide variety of populations in formal informal and remote educational settings The procedures take the form of rules that learners comply with in the exercise of their freedom When they are followed the rules provide a grammar for the social norms that govern the moral worlds of learners and compel them to flourish Tested over two decades in her work as a teacher scholar and school reformer in more than 20 NYC public schools the McCallister Method has delivered an innovative and disruptive approach to schooling that has proven successful in finally transforming low performing industrial schools into 21st century learning organizations Online support material includes assessments records surveys and more to be used in school design and classroom settings **Excellence Through Equity** Alan M. Blankstein, Pedro Noguera, Lorena Kelly, 2016-02-26

Excellence Through Equity is an inspiring look at how real world educators are creating schools where all students are able to thrive In these schools educators understand that equity is not about treating all children the same They are deeply committed to ensuring that each student receives what he or she individually needs to develop their full potential and succeed To help educators with what can at times be a difficult and challenging journey Blankstein and Noguera frame the book with five guiding principles of Courageous Leadership Getting to your core Making organizational meaning Ensuring constancy and consistency of purpose Facing the facts and your fears Building sustainable relationships They further emphasize that the practices are grounded in three important areas of research that are too often disregarded 1 child development 2 neuroscience and 3 environmental influences on child development and learning You ll hear from Carol Corbett Burris Michael Fullan Marcus J Newsome Paul Reville Susan Szachowicz and other bold practitioners and visionary

thinkers who share compelling and actionable ideas strategies and experiences for closing the achievement gap in your classrooms and school Ensuring that all students receive an education that cultivates their talents and potential is in all our common interest As Andy Hargreaves writes in the coda The opportunity for all Americans is to articulate and believe in an inspiring vision of educational change that is about what the next generation of America and Americans should become not about a target or ranking that the nation should attain From the Foreword by Archbishop Desmond Tutu Letting go of a system of winners and losers in favor of what is proposed in this book is a courageous leap forward that we all must take together Let this bold practical book be a guide and may you travel into this new exciting vista in which every child can succeed

Slow Burn R. Jisung Park, 2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today It's hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In *Slow Burn* R. Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects We can begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally

Experiencing Environment and Place through Children's Literature Amy Cutter-Mackenzie, Phillip Payne, Alan Reid, 2014-06-11 Recent scholarship on children s literature displays a wide variety of interests in classic and contemporary children s books While environmental and ecological concerns have led to an interest in ecocriticism as yet there is little on the significance of the ecological imagination and experience to both the authors and readers young and old of these texts This edited collection brings together a set of original international research based chapters to explore the role of children s literature in learning about environments and places with a focus on how children s literature may inform and enrich our imagination experiences and responses to environmental challenges and injustice Contributions from Australia Canada USA and UK explore the diverse ways in which children s literature can provide what are arguably some of the first and possibly most formative engagements that some children might have with nature Chapters examine classic and new storybooks mythic tales and image based and or written texts read at home in school and in the field Contributors focus on exploring how children s literature mediates and informs our imagination and understandings of diverse environments and places and how it might open our eyes and lives to other presences understandings and priorities through stories their telling and re telling and their analysis This book was originally published as a special issue of Environmental Education Research

Toxic Sexual Politics Melina Packer, 2025-01-28 A bold expos of how the very foundation of toxicology has been contaminated by sexist and racist ideologies The first critical understanding of the field of toxicology from a feminist and antiracist perspective Toxic Sexual Politics asserts that the science of toxicants must be held accountable for the uneven distribution of toxic pollution along racial and sexual lines Drawing upon in depth interviews and extensive ethnographic and archival research including participant observations in toxicology classrooms conferences and laboratories Melina Packer urges environmental health advocates to place toxicant science within its masculinist militarist and eugenicist history Toxic Sexual Politics shows how the founding fathers of U S toxicology were ideologically aligned with the chemical industry inventing a science that could make chemicals safe as opposed to one that could adequately protect planetary health from toxicants hazards While many toxicologists today are critical of the chemical industry they continue to rely on the highly limited tools of toxicology as accurate measures of toxicity as do government regulators the courts and environmental advocates Unlike most critiques of the chemical industry and narratives of environmental health movements Toxic Sexual Politics refuses to take the science at face value By focusing on the sexist racist and ableist biases reinforced by toxicology Packer powerfully argues that this scientific discipline reproduces the very same white supremacist and heterosexist logics

that generated environmental injustices in the first place The field of toxicology can explicitly confront chemical corporate power by building from queer feminist anti ableist and antiracist movements for environmental and reproductive justice
