Documenting Cityscapes Iván Villarrea Álvarez, 2015-05-12 While film studies has traditionally treated the presence of the city in film as an urban text operating inside of a cinematic one this approach has recently evolved into the study of cinema as a technology of place From this perspective Documenting Cityscapes explores the way the city has been depicted by nonfiction filmmakers since the late 1970s paying particular attention to three aesthetic tendencies documentary landscaping urban self portraits and metafilmic strategies Through the formal analysis of fifteen works from six different countries this volume investigates how the rise of subjectivity has helped to develop a kind of gaze that is closer to citizens than to the institutions and corporations responsible for recent major transformations Documenting Cityscapes therefore reveals the extent to which cinema has become an agent of urban change in which certain films not only challenge the most controversial policies of late capitalism but also are able to produce spatiality themselves

Street Art, Public City Alison Young, 2013-11-20 What is street art Who is the street artist Why is street art a crime Since the late 1990s a distinctive cultural practice has emerged in many cities street art involving the placement of uncommissioned artworks in public places Sometimes regarded as a variant of graffiti sometimes called a new art movement its practitioners engage in illicit activities while at the same time the resulting artworks can command high prices at auction and have become collectable aesthetic commodities Such paradoxical responses show that street art challenges conventional understandings of culture law crime and art Street Art Public City Law Crime and the Urban Imagination engages with those paradoxes in order to understand how street art reveals new modes of citizenship in the contemporary city It examines the histories of street art and the motivations of street artists and the experiences both of making street art and looking at street art in public space It considers the ways in which street art has become an integral part of the identity of cities such as London New York Berlin and Melbourne at the same time as street art has become increasingly criminalised It investigates the implications of street art for conceptions of property and authority and suggests that street art and the urban imagination can point us towards a different kind of city the public city Street Art Public City will be of interest to readers concerned with art culture law cities and urban space and also to readers in the fields of legal studies cultural criminology urban geography cultural studies and art more generally

Better By Design? Paul L. Knox, 2020-10-09 The design professions architecture city planning landscape architecture and urban design share a great deal in terms of intellectual antecedents professional ideals and praxis In particular they share a commitment to creating better cities whether at the scale of buildings neighborhoods or city regions But who decides what constitutes a good city and how should such an ideal be implemented In *Better by Design* Paul Knox explores the intellectual roots of the design professions showing how architects planners and other designers have traditionally interpreted their roles and implemented their ideas in cities across North America and the UK Drawing on his long record of research and award winning publications on the social production of the built environment Knox offers a critical appraisal of their ultimate effectiveness in achieving the goal of creating and sustaining good cities

The City Symphony Phenomenon Steven Jacobs, Eva Hielscher, Anthony Kinik, 2018-07-20 The 1920s and 1930s saw the rise of the city symphony an experimental film form that presented the city as protagonist instead of mere decor Combining experimental documentary and narrative practices these films were marked by a high level of abstraction reminiscent of high modernist experiments in painting and photography Moreover interwar city symphonies presented a highly fragmented oftentimes kaleidoscopic sense of modern life and they organized their urban industrial images through rhythmic and associative montage that evoke musical structures In this comprehensive volume contributors consider the full 80 film corpus from Manhatta and Berlin Die Sinfonie der Grosstadt to lesser known cinematic explorations

Classroom Wars Natalia Mehlman Petrzela, 2015-03-03 The schoolhouse has long been a crucible in the construction and contestation of the political concept of family values Through Spanish bilingual and sex education moderates and conservatives in California came to define the family as a politicized and racialized site in the late 1960s and 1970s Sex education became a vital arena in the culture wars as cultural conservatives imagined the family as imperiled by morally lax progressives and liberals who advocated for these programs attempted to manage the onslaught of sexual explicitness in broader culture Many moderates however doubted the propriety of addressing such sensitive issues outside the home Bilingual education meanwhile was condemned as a symbol of wasteful federal spending on ethically questionable curricula

and an intrusion on local prerogative Spanish language bilingual bicultural programs may seem less relevant to the politics of family but many Latino parents and students attempted to assert their authority against great resistance in impassioned demands to incorporate their cultural and linguistic heritage into the classroom Both types of educational programs in their successful implementation and in the reaction they inspired highlight the rightward turn and enduring progressivism in postwar American political culture In Classroom Wars Natalia Mehlman Petrzela charts how a state and a citizenry deeply committed to public education as an engine of civic and moral education navigated the massive changes brought about by the 1960s including the sexual revolution school desegregation and a dramatic increase in Latino immigration She traces the mounting tensions over educational progressivism cultural and moral decay and fiscal improvidence using sources ranging from policy documents to student newspapers from course evaluations to oral histories Petrzela reveals how a growing number of Americans fused values about family personal and civic morality which galvanized a powerful politics that engaged many Californians and ultimately many Americans In doing so they blurred the distinction between public and private and inspired some of the fiercest classroom wars in American history Taking readers from the cultures of Orange County mega churches to Berkeley coffeehouses Natalia Mehlman Petrzela's history of these classroom controversies sheds light on the bitterness of the battles over diversity we continue to wage today and their influence on schools and society nationwide
