News World Report Business School Ranking:

Finding the Best Business School for You Everette E. Dennis, Sharon P. Smith, 2006-06-30 Ultimately finding the best and most appropriate business school requires more than following trends and assessing rankings Dennis and Smith offer an approach that is designed to help prospective MBA students cast their nets widely thinking more expansively creatively and strategically with both short and long term implications in mind Discussing the pros and cons of a formal business education in the context of evolving attitudes toward management and the role of the MBA in developing successful leaders the authors help readers identify their underlying motivations for pursuing an MBA learn how to read between the lines of the popular rankings and utilize the concept of return on investment ROI to evaluate programs on the basis of their contribution to long term professional and personal goals At a time when one fourth of all master s degrees conferred are in business Finding the Best Business School for You offers practical insights for making wise decisions and getting the most out of the MBA experience The truth is that in response to changes in the global business environment many schools are redesigning their curricula forging closer ties with businesses and giving students more freedom to customize their degrees Some of the most innovative programs are being designed at public universities and other institutions out of the spotlight Planning the Development of Builders, Leaders and Managers for 21st-Century Business: Curriculum Review at Columbia Business School N. Capon, 2012-12-06 Business and management education has an important impact on business practice throughout the world To a very large extent possession of the MBA degree is a passport into the upper reaches of management and CEOs of many major corporations have earned an MBA It is a reasonable inference that the education received by these leaders and managers during their MBA experience has an important impact on the way that businesses throughout the world are led and managed and that major corporate decisions are made The heart of the MBA education is the curriculum and curriculum design is perhaps the most important strategic function for a business school faculty to undertake In order to understand the many issues concerning this contemporary curriculum review this book examines three related contextual domains First it details the long term growth of business and management education Second it examines the major theoretical and empirical literatures on organizational evolution and decision making paying special attention to decision making in institutions of higher education Finally the book describes the previous major curriculum review at Columbia Business School in the late 1950s and the subsequent changes that formed the curriculum that was changed in 1992 This book demonstrates what can be achieved by an institution that sets high standards for its business education and assists faculty and administrators in other schools of business and management as they contemplate revision of their curricula In addition it provides a prime example of curriculum design effort in one of the leading institutions worldwide Finally it will be of interest to scholars in several different fields notably higher education curriculum review organizational decision making and long run organizational evolution **Research Handbook on University Rankings** Hazelkorn, Ellen, Mihut, Georgiana, 2021-12-10

Gathering unique and thoughtful contributions from leading international scholars this timely Research Handbook offers diverse perspectives on university rankings twenty years after the first global rankings emerged It presents an in depth analysis that reflects the current state of research on rankings their influence and impact **University Rankings** Jung Cheol Shin,Robert K. Toutkoushian,Ulrich Teichler,2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties *Ranking Business Schools* Linda Wedlin,2006-01-01 In her admirable book Wedlin entangles what business school rankings really are and why they have become so important The book contains plenty to interest the growing army of business school employees whose duties at least in part are concerned with boosting their institution s position in the rankings Education and Training In times when the management education field is increasingly impacted by a proliferation of ranking exercises this book is a timely and welcome contribution Linda Wedlin unpacks for us the real meaning of the contemporary explosion of rankings Rather than simple classification schemes and mechanisms rankings are she suggests arenas where the field of business education is being created and re created They are the loci of boundary work whereby a field is progressively evolving and constituting itself This is a convincing study relying on rich empirical data and carefully anchored in relevant theoretical debates A must read for all those academics students policy makers and education professionals who want to understand the complex contemporary logics of higher education in management but also probably well beyond Marie Laure Djelic ESSEC Business School Paris France League tables appear everywhere and have become important aspects of business school environments Based on in depth and creatively combined empirical studies Linda Wedlin provides us with explanations and insights on the emergence and impact of such rankings This book should be of great value for all those who seek to play the ranking game It gives a fresh perspective on how classification mechanisms drive the emergence boundary setting and change of organizational fields Kerstin Sahlin Andersson Uppsala University Sweden A fascinating study of the complex issues surrounding MBA rankings Business schools really hate them but at times have to pretend to love them Magazines and newspapers are really interested in their sales potential but have to make pretensions about their veracity Linda Wedlin focuses on an area rich in hypocrisy and hype but also one where there are real consequences ranking furthered re inforces

the homogenising tendencies of MBAs Anthony Hopwood Sa d Business School University of Oxford UK This is a most fascinating topic dealt with in a manner which is both serious and entertaining everyone in a business school would want to read it Linda Wedlin s excellent research is presented with a no nonsense approach if there is anything worth counting she counts it and then interprets it no fuss Exemplary Barbara Czarniawska G teborg University Sweden This engaging book offers a fresh perspective on the burgeoning field of European management education and its intense concern with rankings Using a creative mix of well crafted research tools Wedlin deftly captures a professional field in transition as it both expands and develops shared standards Walter W Powell Stanford University US International comparisons and rankings of universities and business schools have proliferated in recent years Ranking Business Schools provides a welcome analysis of this development and its implications for the field of management education theorizing the role of classifications such as rankings in forming and structuring organizational fields Focusing on the European experience with rankings and the subsequent response the book illustrates how business schools use rankings to form identities and positions and to draw boundaries for the field By both creating and confirming belonging to a business school community and providing distinction within that group rankings are important for defining an international field of management education organizations constructing an international business school market and constitute an arena for debating and establishing the boundaries of this field Building an extensive theoretical framework for understanding classification

The Duke Legacy D. W. Duke, 2014 Washington Duke is very young when he first realizes there is racial discrimination in the South Living outside of Hillsboro North Carolina in the mid 1820s he is one of ten children in a family that shares the wilderness with bears rattlesnakes and mountain lions Washington learns about the world around him from his scholarly father nurtures a compassion for others and eventually grows into a man deeply troubled by the institution of slavery Unaware of what awaits him Washington is conscripted into the Confederate Army and reluctantly leaves his three hundred acre farm in 1864 to fight in the war When the Civil War is over Washington is left widowed with nothing but his farm two blind mules a wagon load of tobacco and his four children Determined to rise from the rubble Washington soon begins building the foundation for the Duke financial empire although not without challenges As Washington ages his sons eventually capture his dream to establish Duke University Even with the family s successes though there is tragedy and heartache Washington s granddaughter Doris dies under suspicious circumstances in 1993 and her estate becomes embroiled in a legal battle Based on a true story this compelling and inspirational tale examines the life of a gentle giant and his descendants who together built a multibillion dollar empire numerous charitable foundations and a renowned academic institution proving that anyone can overcome adversity to achieve greatness

Some colleges will do anything to improve their national

ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

No Finish Line Meyer Feldberg, 2020-05-05 Meyer Feldberg is a storyteller The source of his stories is his rich and unique life which took him from South Africa under apartheid to a C Suite in present day New York from the hallowed halls of academia to the frenzy of global investment banking As with all storytellers there is a purpose embedded in each of his stories that is specific in its details but universal in its message No Finish Line is Meyer Feldberg as his friends and colleagues know him It is the professor dispensing sage advice It is the mentor telling a tale about himself that is really about you In his telling Feldberg s story his successes and his failures is a lesson plan for how to lead a worthy personal and professional life This concise volume reminds the reader of the importance of courage and decency in our relationships Feldberg shows how values such as self awareness personal responsibility and generosity play out in ways that in retrospect become pivotal He relates his regrets as well as his triumphs candidly sharing how our failures to live up to our own expectations can continue to haunt us Written by a leading fixture of New York s educational cultural and business elite No Finish Line is an engaging portrait of what matters most in living a good and successful life

Handbook of Research on Managing Managers Adrian Wilkinson, Keith Townsend, Gabriele Suder, 2015-12-18 In recent years there has been considerable debate on the future of management but less attention on the changing role of managers in the workplace This book considers the ways in which managers themselves are being managed In so doing the contributors reflect upon the research conducted to date and the potential research pathways With contributions from experts in the field the book

explores the ways organisations manage their managers and how this continues to evolve globally Themes discussed include talent management evidence based management the nature of managerial work management learning and education and development as well as women in management and cross cultural issues Academics researchers analysts and students will find this an important Handbook to aid in their understanding of the contemporary world of managers

Managing Elites Debra J. Schleef, 2006 How does one become a member of an elite profession Managing Elites examines how elites in training contest rationalize and ultimately enthusiastically embrace their dominant positions in society Using interviews with 79 law and MBA students the author argues that elite socialization requires both accommodation and resistance to professional ideologies Students develop a collective cynicism about elements of their education learning that their discipline imparts esoteric knowledge but also claiming that they didn't learn anything They struggle with the idea that fellow students are all equally intelligent and therefore deserving of elite status and the continuing emphasis on activities that sort students Students resist that paths to success promoted by school cultures investment banking consulting or becoming partner in a large law firm Such cynicism is indeed ultimately revealed to be temporary as most students end up in full support of these jobs of least resistance Their critiques do however create tensions between competition and cooperation between the individual and the collective and between egalitarianism and elitism Part of elite socialization is learning to deal with these tensions or more specifically to hold contradictory ideals at the same time

Transforming Higher Education Stephen J. Rosow, Thomas Kriger, 2012-07-10 The university is being transformed and can be transformed This doubleness informs this book Transforming in transforming higher education can be read as adjective suggesting that higher education is being transformed by the social and political situation in which it is enmeshed Transforming can also be read as a gerund implying the critical activity of changing the university as signaling a creative and political act of radical possibility The essays in this book address the transformation of higher education and the transformative possibilities of its current conditions Only by viewing the university as a historical construction can we assess the dangers and opportunities of the new conditions of higher education and chart a reasonable course for the future The essays in this book are critical of recent developments in universities and higher education Most of us come from public universities and all remain committed to a democratic higher education that we see threatened by recent developments There is a danger that the combination of economic crisis market ideology and global pressures will continue to structure the debate about higher education in ways that freeze out the transformative and politically critical possibilities of the university Part I of the book examines the historical transformation of the university as it has changed into its current form Part II examines both the transformation of the university into a neoliberal institution and makes the case for the more political and radical idea of transforming the university in opposition to how it has been transformed in recent years Part III offers a number of studies aimed at illuminating possibilities for transforming the university in a more progressive democratic direction

Rethinking the MBA Srikant M. Datar, David A.

Garvin, Patrick Gerard Cullen, 2010 The authors give the most comprehensive authoritative and compelling account yet of the troubled state of business education today and go well beyond this to provide a blueprint for the future **Our Cherished Halls of Ivy** Phillip L. Beukema, 2022-10-10 Higher education has both supporters and detractors although not in equal numbers Some would have us believe that our higher education enterprise is on the brink of disaster that it's falling apart at the seams Some go so far as to call the system broken beyond repair suggesting that it be rebuilt from the ground up Can it be this bad Drawing on his long experience in higher ed administration the author examines the sea change that's affected nearly every corner of the higher learning landscape These corners include the high and rising costs of tuition the crushing levels of student debt the shamefully low graduation rates in too many schools the growing million dollar clubs whose members include university presidents and football and basketball coaches the inadequacies of accreditation and the growing influence of partisan politics in the conduct of our public universities That's for starters With an insider's perspective the author paints a picture that is up front and honest laying bare the depth and extent of specific problems confronting that crucial engine of our economy higher education In each case he spells out what needs a tune up and what needs something closer to an overhaul Of course he offers specific proposals for fixing those problems They're likely to be controversial but the author hopes they spark a debate that ultimately leads to productive solutions
