Next Intake Of Nurses In Zimbabwe:

African nurses and everyday work in twentieth-century Zimbabwe Clement Masakure, 2020-12-15 Informed by the memories of African nurses this book highlights the experiences of men and women who provided nursing services in Zimbabwe's hospitals in the twentieth century. It argues that in their subordinate positions and within their various capacities nursing assistants, nursing orderlies, medics, and qualified nurses, African women and men played a pivotal role in the provision of healthcare services to their fellow Africans. They transformed hospital spaces into their own, reshaped and reformulated indigenous as well as western nursing and biomedical practices. Through their work, African nurses contributed to the development of the nation by being at the bedside, healing the sick and nursing the infirm. *Godly Medicine in Zimbabwe* Michael Gelfand, 1988

The Past Is Gone but Never Forgotten: An epic journey from Zimbabwe to Canada Oscar D. Simela Ph.D., 2020-10-19 This book is both a description of my journey from Zimbabwe to Canada and a partial story of my life before and after emigrating to Canada in 1990. The journey began with a dream that my wife Barbara Sithabile Simela and I had in the late 1980s when we lived in Zimbabwe. Our dream and hopes were to find a place where we could raise our children in peace and tranquility where they could nurture and nourish their own dreams to their full God-given potential. Early chapters of the book present a heart-wrenching decision that I made to abandon a position which I held so dearly with the National Museums and Monuments of Zimbabwe as Acting Regional Director for the western region. It then chronicles the steps we took to apply for permanent residence in Canada.

Voting with Their Feet Rudo B. Gaidzanwa, 1999 This research report examines the ways in which medical professionals have responded to the changing environment of work and livelihood in Zimbabwe since the adoption of a structural adjustment program. Geographies of Health and Development Rachel Bezner Kerr, Isaac Luginaah, 2016-03-03 The geographies of health and development is an emerging sub-discipline tying in with many of the conceptual, theoretical, and practical components of other disciplines working in health, health care, economics, and international development. Spatially and theoretically grounded in geography, this collection offers a fresh perspective on the dialectic relationships between health and development. Health problems in a developing context take on much higher rates of prevalence as a result of the varied cultural, structural, and economic vulnerabilities of the people they impact. This book begins by exploring some of the circumstances surrounding the distinctive health inequities currently facing many developing countries, including malaria, maternal mortality, and HIV/AIDS. This is followed by a discussion of how matters of physical access and human resource

issues and perhaps most importantly the challenges of financing together shape the access and utilization of health care Examining how the environment interacts to influence the health of the people that live there the next section includes discussion around challenges of food in security and the importance of clean and uncontaminated water for health Finally the book explores the influence of globalization on health specifically within the urban environment against the backdrop of global health policy

Beyond the Enclave Godfrey Kanyenze,Timothy Kondo,2011-07-26 Beyond the Enclave sets out to unravel the contradiction of a country Zimbabwe where a rich diverse resource base co exists with endemic poverty One reason lies in the colonial economy which was predicated on an ideology of white supremacy creating an enclave formal economy employing one fifth of the labour force Yet over three decades after independence the non formal segment has become even more entrenched This book assesses Zimbabwes economy through three main phases 1980 90 when a strong social policy framework proved difficult to sustain due to erratic growth and 1991 96 when structural adjustment demanded a market driven approach to development The third phase is characterized by crisis management leading to policy inconsistencies and reversals Not surprisingly such incoherence saw the economy descend into hyperinflation and paralysis in 2007 2008 leading to the signing of the Global Political Agreement in September 2008 In the absence of formal dollarization economic recovery after the adoption of the multi currency regime has remained fragile leaving an estimated 70 per cent of the population outside the banking system This has further entrenched uneven enclave growth as the economy remains locked in a low income poverty trap There is a need to facilitate transition towards formality to promote decent jobs Furthermore a strategic developmental role for the state in the economy is now widely recognized as vital for development Beyond the Enclave argues for a new approach to development in Zimbabwe based on pro poor and inclusive strategies which will contribute to the well being of all of its citizens and wise stewardship of its resources It offers suggestions on policy formulation implementation monitoring and evaluation in all sectors designed to promote inclusive growth and humane development
