In addition, starter routines, modification strategies and instructor assessment criteria are presented for seven class formats: kickboxing, step training, stationary indoor cycling, sport conditioning and boot camp, water exercise, yoga and mat based Pilates. The text also touches on alternative modalities including dance based classes, fusion and mind body training. Thoroughly revised and reorganized based on industry standards, the third edition of *Methods of Group Exercise Instruction* offers expanded content to help readers become better instructors. Updates to the third edition include the following: Online video totaling over 100 minutes demonstrates key content in the text. New chapters cover social aspects of group exercise, coaching based instructional models and neuromotor and functional training. Callout boxes highlight important topics, research findings, technique and safety checks and practice drills which facilitate quick learning. Short assignments at the close of each chapter encourage readers to look beyond the text to gain practical experience. Evaluation forms and evaluation key points allow instructors to gauge their teaching success and adapt the key criteria of a successful class to each exercise modality. The three part structure of this book is retained from the previous edition but the content is reorganized to better reflect industry standards and guidelines.
