Abstract

To prevent serious eye injury, always wear safe eye protection when you perform vehicle maintenance or service.

Park the vehicle on a level surface. Block the wheels to prevent the vehicle from moving. Support the vehicle with safety stands. Do not work under a vehicle supported only by jacks. Jacks can slip and fall over. Serious personal injury and damage to components can result.

ACC is an advanced vehicle control system from Mercedes-Benz that reduces chances of a rollover and gives the driver better maneuverability and control. However, any vehicle may oversteer in some situations with or without ACC.

Having ABS does not allow drivers to take unnecessary risks. Make sure drivers do not take curves or turns faster than they would without ABS and always use safe driving techniques. Failure to do so can result in serious personal injury, damage to components, or both.

Monter Shocks's rail stability support provides an independent stability system for single, tandem & tri-axle constant powered trailers equipped with air suspensions. It is compatible with both disc and drum foundation brakes. The system consists of

- ROS power (P.I.C.) adapter
- Two or four wheel speed sensors
- Diagnostic cable (bracket not provided)
- External control line pressure sensor and cable (optional)
- BMWCC diagnostic software
