

Summary of National Guidance for Lipid Management for Primary and Secondary Prevention of CVD

INITIAL CONSIDERATIONS:

- Measure non-fasting full lipid profile (total cholesterol, HDL-C, non-HDL-C, triglycerides) and HbA1c as part of an initial baseline assessment. • Consider secondary causes of hyperlipidaemia and manage as needed.
- Ensure appropriate baseline and follow-up tests as detailed on page 2. Measure BMI. • Identify and exclude people with contraindications/drug interactions. • If non-fasting triglyceride above 4.5mmol/L, see page 2.

PRIMARY PREVENTION

Consider statin therapy for adults who do not have established CVD but fall into the categories below. Use QRISK risk assessment tool where appropriate (see page 2). Primary Prevention Risk Assessment:

Identify and address all modifiable risk factors - smoking, diet, obesity, alcohol intake, physical activity, blood pressure and HbA1c.

Consider additional risk factors, if present, together with QRISK score (history for HIV, severe mental illness, fasting medicines that cause dyslipidaemia, systemic inflammatory disorder (e.g. SLE), impaired fasting glycaemia, recent change in risk factors)

PRIMARY PREVENTION

If statin modification is ineffective or inappropriate offer statin treatment. Atorvastatin 20mg daily

- Measure full lipid profile again after 3 months (non-fasting).
- High intensity statin treatment should achieve reduction of non-HDL-C + 40% from baseline. If not achieved after 3 months:
 - Discuss treatment adherence, timing of dose, diet and lifestyle
 - If at higher risk (based on comorbidities, risk score or clinical judgement - see page 2 Additional Risk Factors) consider increasing the dose every 2-3 months up to a maximum dose of atorvastatin 80mg daily.
 - For how to increase in people with CKD see 'Special Patient Populations' (page 2).

- If patients on a high-intensity statin have side effects, offer a lower dose or an alternative statin (see page 2 Extent of lipid lowering with available therapies).
- If maximum tolerated dose of statin does not achieve non-HDL-C reduction + 40% of baseline value after 3 months consider adding ezetimibe 10mg daily (NICE TA385).
- If statin treatment is contraindicated or not tolerated:
 - See AAC Statin Intolerance Algorithm for advice regarding adverse effects [\(link\)](#), [\(link\)](#)
 - Ezetimibe 10mg monotherapy may be considered. Assess response after 3 months.
 - Ezetimibe 10mg/therapeutic acid 160 mg combination may be considered when ezetimibe alone does not control non-HDL-C/LDL-C well enough (NICE TA385).

If non-HDL-C reduction remains + 40% of baseline despite maximal tolerated lipid lowering therapy (including people with intolerances and contraindications) consider referral to specialist lipid management clinic according to local arrangements

SEVERE HYPERLIPIDAEMIA

If TC > 7.5mmol/L, and/or LDL-C + 5.5mmol/L, and/or non-HDL-C + 5.5mmol/L, a personal and/or family history of confirmed CVD (≥ 50 years) and with no secondary causes suspect familial hypercholesterolaemia (possible heterozygous FH). Do not use QRISK risk assessment tool

DIAGNOSIS AND REFERRAL

Take fasting blood for repeat lipid profile to measure LDL-C. Use the Simon Broome or Dutch Lipid Clinic Network (DLCN) criteria to make a clinical diagnosis of FH. Refer to Lipid Clinic for further assessment. Potential diagnosis of FH or if TC > 7.5mmol/L, and/or LDL-C + 5.5mmol/L, and/or non-HDL-C + 5.5mmol/L, or Fasting triglycerides + 10mmol/L, regardless of family history (page 2).

TREATMENT TARGETS IN FH

If clinical diagnosis of FH and/or other risk factors present follow the recommended treatment management pathway for primary or secondary prevention as for non-FH, BUT Aim to achieve at least a 50% reduction of LDL-C (or non-fasting non-HDL-C) from baseline.

Consider specialist referral for further treatment and/or consideration of PCSK9 therapy if:

- they are assessed to be at very high risk of a 'secondary event'
- OR therapy is not tolerated
- OR LDL-C remains +5mmol/L (primary prevention)
- OR LDL-C remains +3.5mmol/L (secondary prevention)

 Despite maximal tolerated statin and ezetimibe therapy

*Refused at any of the following:

- Established coronary heart disease
- Two or more other CVD risk factors

SECONDARY PREVENTION

Offer statin therapy to adults with CVD, this includes CHD, angina, Acute Coronary Syndrome, MI or unstable angina, revascularisation, stroke or TIA, or symptomatic peripheral arterial disease. Do not delay statin treatment if a patient has acute coronary syndrome. Take a lipid sample on admission (within 24 hours)

Identify and address all modifiable risk factors - smoking, diet, obesity, alcohol intake, physical activity, blood pressure and HbA1c.

SECONDARY PREVENTION

- Do not delay statin treatment in secondary prevention while managing modifiable risk factors. Prescribe a high intensity statin. Atorvastatin 80mg daily.
- Use a lower dose of atorvastatin if there is a potential drug interaction, high risk of experiencing adverse effects, or patient preference.
- Offer atorvastatin 20mg if CVD (people with DFR + 40 eLumen7 T301)

- Measure full lipid profile again after 3 months (non-fasting).
- High intensity statin treatment should achieve reduction of non-HDL-C + 40% from baseline. If not achieved after 3 months:
 - Discuss treatment adherence, timing of dose, diet and lifestyle measures
 - If started on less than atorvastatin 80mg and the person is judged to be at higher risk (based on comorbidities, risk score or clinical judgement - see page 2 Additional Risk Factors), consider increasing to 80mg atorvastatin. For how to increase in people with CKD see 'Special Patient Populations' (page 2).
 - If non-HDL-C baseline value is not available*, consider target non-HDL-C + 2.5mmol/L (approximately equivalent to LDL-C + 1.5mmol/L) as recommended by Joint British Societies (JBS3).
- *This scenario is not currently covered by NICE CG181. NICE will consider this as part of the guideline update with publication currently expected December 2023.
- If patients on a high-intensity statin have side effects, offer a lower dose or an alternative statin (see page 2 Extent of lipid lowering with available therapies).

If maximum tolerated dose of statin does not control non-HDL-C/LDL-C well enough after 3 months (confirm statin adherence, then consider the following options based on shared decision making* with the patient)

Additional CV risk reduction considerations - check fasting triglyceride levels and consider coadjunct therapy. See triglycerides section overleaf

Heidelbaugh, 2015-10-15 Clinics Collections Lipid Disorders draws from Elsevier's robust Clinics Review Articles database to provide multidisciplinary teams including general practitioners cardiologists endocrinologists pathologists cardiologists rheumatologists and hepatologists with practical clinical advice and insights on this highly prevalent condition and its comorbidities Clinics Collections Lipid Disorders guides readers on how to apply current primary research findings on lipid disorders to everyday practice to help overcome challenges and complications keep up with new and improved treatment methods and improve patient outcomes Areas of focus include lipids and biomarkers lipids and pharmacotherapy lipids and heart disease lipids and chronic disease lipids and pediatrics lipids and women's health and special considerations Each article begins with keywords and key points for immediate access to the most critical information Articles are presented in an easy to digest and concisely worded format Elsevier's Clinics Collections provide concise reviews of today's most prevalent conditions and significant medical developments Other Clinics Collections titles available include Type II Diabetes Mellitus Asthma Obesity and Pain Management **Clinical Lipid Management** Jennifer G. Robinson, MD, 2023-10-11 Presents the newest thinking and data needed for clinicians to reduce atherosclerotic cardiovascular disease ASCVD risk This book provides detailed evidence based guidance for treating cholesterol to reduce ASCVD with a focus on recent ACC AHA guidelines an overview of evidence based treatment of other risk factors the management of genetic and acquired lipid disorders and complete efficacy and safety information on all available lipid lowering agents including clinical trial data and FDA approved labeling **Management of Cardiovascular Disease in Women** Hanna Z. Mieszczanska, Gladys P. Velarde, 2014-03-24 Cardiovascular disease is the leading cause of death in women in the US with more women dying from heart disease than men Women may have different presentation from men and often need a different approach to diagnosis and treatment There are also unique topics of management of heart disease in women including issues during pregnancy lactation and menopause Many different health care providers as well as cardiologists are involved in treating these patients A manual reviewing diagnosis and treatment of cardiac disease in women would help providers without specific cardiology training to deliver care with greater efficiency A practical and comprehensive guide geared towards these providers would be a highly practical and valuable resource that would be

utilized in everyday practice in offices that include urban clinics general medicine offices obstetrics and gynecology offices as well as in the surgical subspecialties This book will be a highly practical resource that can be directly applied to the issues that arise in everyday practice There is no available book on the market that focuses on a broader approach to cardiac disease in women or focuses on non cardiology providers and their trainees who have the need to know more about treatment of cardiovascular disease in women

Informing Clinical Practice in Nephrology Mohsen El Kossi, Arif Khwaja, Meguid El Nahas, 2015-04-01 Historically clinical decisions in renal medicine have been challenged by the scarce availability of robust supportive evidence Not only are the number of randomized controlled trials RCTs in Nephrology the third lowest amongst the medical specialties but in many instances the trials themselves are of poor quality In addition practice has been further influenced by extrapolation from the outcomes of general population clinical trials which exclude renal patients The difference between the ideal trial participant and real complex cases encountered in daily practice is well recognized and further compounded in renal patients with complex pathophysiology this ultimately makes decision making in this subset of patients a real challenge Recently there has been a growing interest in conducting well designed RCTs in different areas of renal medicine However though clinical guidelines are helpful in providing the clinicians with a frame of best available evidence for a clinical condition it denies the unique nature of each individual patient This book offers a thorough and critical appraisal and evaluation of the key published clinical trials that have shaped current practice in nephrology dialysis and transplantation It will help the practicing physician close the gap between the inflexible and generalized nature of clinical guidelines and the day to day clinical decision making for individual patients It will provide the clinician with the tools required to investigate and extract the appropriate guidance to apply to individual cases in daily practice Moreover it will help improve the ability of junior colleagues to appraise available evidence in a systematic way when there is lack of local guidelines or when the guidelines are difficult to apply due to logistic constraints or barriers Lastly this book will serve as a reference for key clinical trials in different areas of renal medicine together with literature and authors views of these trials and their impact on changing practice

New Lipid Guidelines Summary Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading New Lipid Guidelines Summary free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading New Lipid Guidelines Summary free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that

offer free PDF downloads on a specific topic. While downloading New Lipid Guidelines Summary free PDF files is convenient, it's important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but it's essential to be cautious and verify the authenticity of the source before downloading New Lipid Guidelines Summary. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether it's classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading New Lipid Guidelines Summary any PDF files. With these platforms, the world of PDF downloads is just a click away.

You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression

reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
