many options,
but this is easiest

$$\frac{AB}{CB} = \frac{DB}{EB}$$

$$\frac{15}{12} = \frac{x}{5}$$

$$\frac{15}{12} = \frac{x}{5}$$

$$12x = 75$$

Overcoming the Odds Jennie E. Brand, 2023-08-31 Each year millions of high school students consider whether to continue their schooling and attend and complete college Despite evidence showing that a college degree yields far reaching benefits critics of higher education increasingly argue that college does not pay off and some students namely disadvantaged prospective college goers would be better served by forgoing higher education But debates about the value of college often fail to carefully consider what is required to speak knowledgeably about the benefits what a person s life might look like had they not completed college or their college counterfactual In Overcoming the Odds sociologist Jennie E Brand reveals the benefits of completing college by comparing

life outcomes of college graduates with their college counterfactuals Drawing on two cohorts of nationally representative data from the Bureau of Labor Statistics National Longitudinal Surveys program Brand uses matching and machine learning methods to estimate the effects of college completion across students with varying likelihoods of completing four year degrees To illustrate her findings Brand describes outcomes using matched vignettes of college and non college graduates Brand shows that four year college completion enables graduates to increase wages and household income while also circumventing unemployment low wage work job instability poverty and social assistance Completing college also increases civic engagement Most of these benefits are larger for disadvantaged than for more advantaged students rendering arguments that college has limited benefits for unlikely graduates as flawed Brand concludes that greater long term earnings and less job instability and unemployment and thus more tax revenue less reliance on public assistance and high levels of volunteering indicate that public investment in higher education for students from disadvantaged backgrounds yields far reaching collective benefits She asserts that it is better for our society when more people complete college Overcoming the Odds is an innovative and enlightening exploration of how college can transform lives From the Ground Up Alison

[The Lonely Mind of God](#) Sherman O'Brien, 2021-01-26 Current students of philosophy or armchair philosophers Want the answer to the Primordial Existential Question Why is there something rather than nothing While history has produced no shortage of attempted answers clearly none is the answer Now comes the unique perspective of acosmism to provide a complete and plausible answer After a lifetime of reflection acosmist Sherman O'Brien offers this

analysis of the issues and a thoughtful reasoned answer to philosophy's most vexing question. The a cosmic answer requires no faith whatsoever either in supernatural or unexplained causes; in fact, it discourages it. Acosmism rejects both traditional religion and philosophically neglectful science. As a metaphysical system, it is based on an epistemological insight with implications for immortality, determinism, ethics, and ultimate purpose. Reasoned wholly from the ground up, its conclusion is the very meaning of existence. The solution to the Omniscience Riddle becomes the key to understanding how the question is best stated and understood. This book represents one person's effort to make sense of what is true and what only seems to be so. Why is there something rather than nothing? What is your potential role in the entirety of experience? This foray into acosmism offers a path to the genuine understanding of both existence and reality. Note: the main text constitutes roughly two thirds of the total pages, the remainder being mostly endnotes.
