New York Times Autonomous Report:

Reporting China on the Rise Yuan Zeng, 2019-04-10 Drawing on the structural constructivist framework of journalistic field and habitus *Reporting China on the Rise* examines the internal and external dynamics which are shaping the work of foreign correspondents in China during Xi Jinping's tenure. This study presents findings from extensive surveys and interviews with current and former correspondents based in China. It aims to explore how they have responded and continue to respond to pressures from within the journalistic field such as a transforming media industry as well as from constant shifts in global geopolitics and China's increasingly restrictive journalistic environment. These factors are shown to work together to relationally define the news production practice of these correspondents and ultimately shape the final news product. Journalism in modern China has become a widely discussed yet gravely under researched topic both for policy makers and academics. *Reporting China on the Rise* seeks to open up discussions around the role of the foreign press in generating meaningful media coverage of this growing superpower. It will be an invaluable resource for students and researchers of Journalism and Media Studies.

HCI International 2021 - Late Breaking Papers: Multimodality, eXtended Reality, and Artificial Intelligence Constantine Stephanidis, Masaaki Kurosu, Jessie Y. C. Chen, Gino Fragomeni, Norbert Streitz, Shin'ichi Konomi, Helmut Degen, Stavroula Ntoa, 2021-11-10 This book constitutes late breaking papers from the 23rd International Conference on Human Computer Interaction HCII 2021 which was held in July 2021. The conference was planned to take place in Washington DC USA but had to change to a virtual conference mode due to the COVID 19 pandemic. A total of 5222 individuals from academia, research institutes, industry and governmental agencies from 81 countries submitted contributions and 1276 papers and 241 posters were included in the volumes of the proceedings that were published before the start of the conference. Additionally, 174 papers and 146 posters are included in the volumes of the proceedings published after the conference as Late Breaking Work papers and posters. The contributions thoroughly cover the entire field of HCI addressing major advances in knowledge and effective use of computers in a variety of application areas.
