*Failing Law Schools* Brian Z. Tamanaha, 2022-12-22 An essential title for anyone thinking of law school or concerned with America's dysfunctional legal system Library Journal On the surface law schools today are thriving Enrollments are on the rise and law professors are among the highest paid Yet behind the flourishing facade law schools are failing abjectly Recent front page stories have detailed widespread dubious practices including false reporting of LSAT and GPA scores misleading placement reports and the fundamental failure to prepare graduates to enter the profession Addressing all these problems and more is renowned legal scholar Brian Z. Tamanaha Piece by piece Tamanaha lays out the how and why of the crisis and the likely consequences if the current trend continues The out of pocket cost of obtaining a law degree at many schools now approaches 200 000 The average law school graduate's debt is around 100 000 the highest it has ever been while the legal job market is the worst in decades Growing concern with the crisis in legal education has led to high profile coverage in the Wall Street Journal and the New York Times and many observers expect it soon will be the focus of congressional scrutiny Bringing to the table his years of experience from within the legal academy Tamanaha provides the perfect resource for assessing what's wrong with law schools and figuring out how to fix them *Failing Law Schools* presents a comprehensive case for the negative side of the legal education debate and I am sure that many legal academics and every law school dean will be talking about it Stanley Fish Florida International University College of Law [U.S. News & World Report Ultimate Guide to Law Schools](#) Anne McGrath, U S News, 2004 Combines expert advice on how to get into law school U S News exclusive indices and data on all the law school programs in the U S **Final Report** Michael Sauder, 2009 [The American Legal Profession](#) Christopher P. Nafziger,2017-12-29 The topical chapters in this cutting edge collection at the intersection of comparative law and anthropology explore the mutually enriching insights and outlooks of the two fields Comparative Law and Anthropology adopts a foundational approach to social and cultural issues and their resolution rather than relying on unified paradigms of research or unified objects of study Taken together the contributions extend long developing trends from legal anthropology to an anthropology of law and from externally imposed to internally generated interpretations of norms and processes of legal significance within particular cultures The book s expansive conceptualization of comparative law encompasses not only its traditional geographical orientation but also historical and jurisprudential dimensions It is also noteworthy in blending the expertise of long established acclaimed scholars with new voices from a range of disciplines and backgrounds **The**

**Paradox of Professionalism** Scott L. Cummings,2011-02-21 This book is about the role of lawyers in constructing a just society Its central objective is to provide a deeper understanding of the relationship between lawyers commercial aims and public aspirations Drawing on interdisciplinary and comparative perspectives it explores whether lawyers can transcend self interest to meaningfully contribute to systems of political accountability ethical advocacy and distributional fairness Its contributors some of the world s leading scholars of the legal profession offer evidence that although justice is possible it is never complete Ultimately how much and what type of justice prevails depends on how lawyers respond to and reshape the political and economic conditions in which they practise As the essays demonstrate the possibility of justice is diminished as lawyers pursue self regulation in the service of power it is enhanced when lawyers mobilize in the political arena workplace and law school to contest it **May It Please the Campus** Patricia E. Salkin,2022-12-13 A 2022 Green Bag Almanac the

percentage of lawyer presidents serving at public private community HBCUs and religiously affiliated institutions geographic concentrations of campuses led by lawyers women lawyer presidents pathways to the presidency for lawyers commonalities in backgrounds and more The author explores reasons for an exponential increase in lawyers serving as campus leaders examining the growth of legal education and myriad legal and regulatory issues confronting higher education Engines of

Anxiety Wendy Nelson Espeland,Michael Sauder,Wendy Espeland,2016-05-09 Students and the public routinely consult various published college rankings to assess the quality of colleges and universities and easily compare different schools However many institutions have responded to the rankings in ways that benefit neither the schools nor their students In Engines of Anxiety sociologists Wendy Espeland and Michael Sauder delve deep into the mechanisms of law school rankings which have become a top priority within legal education Based on a wealth of observational data and over 200 in depth

interviews with law students university deans and other administrators they show how the scramble for high rankings has affected the missions and practices of many law schools Engines of Anxiety tracks how rankings such as those published annually by the U S News World Report permeate every aspect of legal education beginning with the admissions process The authors find that prospective law students not only rely heavily on such rankings to evaluate school quality but also internalize rankings as expressions of their own abilities and flaws For example they often view rejections from first tier schools as a sign of personal failure The rankings also affect the decisions of admissions officers who try to balance admitting diverse classes with preserving the school s ranking which is dependent on factors such as the median LSAT score of the entering class Espeland and Sauder find that law schools face pressure to admit applicants with high test scores over lower scoring candidates who possess other favorable credentials Engines of Anxiety also reveals how rankings have influenced law schools career service departments Because graduates job placements play a major role in the rankings many institutions have shifted their career services resources toward tracking placements and away from counseling and network building In turn law firms regularly use school rankings to recruit and screen job candidates perpetuating a cycle in which highly ranked schools enjoy increasing prestige As a result the rankings create and reinforce a rigid hierarchy that penalizes lower tier schools that do not conform to the restrictive standards used in the rankings The authors show that as law schools compete to improve their rankings their programs become more homogenized and less accessible to non traditional students The ranking system is considered a valuable resource for learning about more than 200 law schools Yet Engines of Anxiety shows that the drive to increase a school s rankings has negative consequences for students educators and administrators and has implications for all educational programs that are quantified in similar ways *Fixing Law Schools* Benjamin H.

Barton,2019-12-17 An urgent plea for much needed reforms to legal education The period from 2008 to 2018 was a lost decade for American law schools Employment results were terrible Applications and enrollment cratered Revenue dropped precipitously and several law schools closed Almost all law schools shrank in terms of students faculty and staff A handful of schools even closed Despite these dismal results law school tuition outran inflation and student indebtedness exploded creating a truly toxic brew of higher costs for worse results The election of Donald Trump in 2016 and the subsequent role of hero lawyers in the resistance has made law school relevant again and applications have increased However despite the strong early returns we still have no idea whether law schools are out of the woods or not If the Trump Bump is temporary or does not result in steady enrollment increases more schools will close But if it does last we face another danger We tend to hope that crises bring about a process of creative destruction where a downturn causes some businesses to fail and other businesses to adapt And some of the reforms needed at law schools are obvious tuition fees need to come down teaching practices need to change there should be greater regulations on law schools that fail to deliver on employment and bar passage Ironically the opposite has happened for law schools they suffered a harrowing near death experience and the

survivors look like they're going to exhale gratefully and then go back to doing exactly what led them into the crisis in the first place. The urgency of this book is to convince law school stakeholders—faculty, students, applicants, graduates, and regulators—not to just return to business as usual if the Trump Bump proves to be permanent. We have come too far through too much to just shrug our shoulders and move on.

**How to Think About Law School** Michael R. Dillon, 2013-02-21

Along the way, it conveys the author's love of the law and admiration for the role of law in the United States. How to Think About Law School adopts a broader and longer perspective than any of its competitors, beginning with freshman year and covering each year as an undergraduate through law school admissions, the three years of law school, and into the beginnings of legal practice. The Handbook provides useful, concrete, and practical information, including lists of Dos and Don'ts, a Four-Year Checklist, information about key resources, a step-by-step explanation of the law school application process, as well as a formula for selecting competitive, safe, and reach law schools. In addition, it presents detailed information about the law school curriculum each year, the importance of Law Review, clinical programs, Moot Court, interviewing skills, and summer associate positions.

**Choosing State Supreme Court Justices** Greg Goelzhauser, 2016-06-15

Since 1940, more than half of all states have switched, at least in part, from popular election or elite appointment to experiment with merit selection in choosing some or all of their state supreme court justices. Under merit selection, a commission—often comprising some combination of judges, attorneys, and the general public—is tasked with considering applications from candidates vying to fill a judicial vacancy. Ostensibly, the commission forwards the best candidates to the governor, who ultimately appoints them. Presently, numerous states are debating whether to adopt or abolish merit selection. In his short, sharp book, *Choosing State Supreme Court Justices*, Greg Goelzhauser utilizes new data on more than 1,500 state supreme court justices seated from 1960 through 2014 to answer the question: Does merit selection produce better types of judges? He traces the rise of merit selection and explores whether certain judicial selection institutions favor

candidates who have better qualifications are more diverse and have different types of professional experience Goelzhauser's results ultimately contribute to the broader debate concerning comparative institutional performance with respect to state judicial selection

**One America?** Stanley Allen Renshon, 2001 Presented by Renshon political science City U of New York 12 contributions examine identity politics in the United States from a number of ideological perspectives exploring what it means to be an American and calling for various courses of action Some argue that the problem can be found in the inability of our political leaders to show authenticity and courage in tackling racial differences

Other articles suggest that affirmative action school integration and other initiatives that have hitherto been based on race should instead be based on class in order to broaden public acceptance and address real inequalities Still other viewpoints argue that increased immigration is a divisive problem that the Civil Rights Act of 1964 paved the way for a dangerous emphasis on multiculturalism and they criticize Bill Clinton s initiative on race as empty scripted public relations events c
