Chance Encounters Kristien Hens, 2022-12-09 In this rigorous and necessary book Kristien Hens brings together bioethics and the philosophy of biology to argue that it is ethically necessary for scientific research to include a place for the philosopher As well as ethical their role is conceptual they can improve the quality and coherence of scientific research by ensuring that particular concepts are used consistently and thoughtfully across interdisciplinary projects Hens argues that chance and uncertainty play a central part in bioethics but that these qualities can be in tension with the attempt to establish a given theory as scientific knowledge in describing organisms and practices in a sense we create the world Hens contends that this is necessarily an ethical activity Examining genetic research biomedical ethics autism research and the concept of risk Hens illustrates that there is no universal or neutral state of scientific and clinical knowledge and that attending to the situatedness of individual experience is essential to understand the world around us to know its and our limitations and to forge an ethical future *Chance Encounters* is aimed at a broad audience of researchers in bioethics philosophy anthropology sociology as well as biomedical and environmental scientists It will also be relevant to policymakers and the artwork by Christina Stadlbauer and Bartaku will be of interest to artists and writers working at the intersection of art and science

uniquely long and complicated migrations Photo by Chuck Heikkinen Humanize Thomas Heatherwick,2023-11-07 From one of the world's most innovative designers comes a fiercely passionate manifesto on why so many places have become miserable and boring and how we can make them better for everyone featuring hundreds of photographs and illustrations that will change how you see the world around you We are living through a global catastrophe Buildings affect how we feel moment by moment day by day They have the power to lift us up and make us feel awestruck playful safe and inspired just as they can make us feel alienated and sad But many of the places where we live work learn and heal have become monotonous and disposable We're surrounded by cheap boring buildings that make people stressed sick and unhappy In short much of our world has been crafted in a way that is hostile to human experience Now drawing on his experience of the last thirty years in making bold beautiful objects and buildings Thomas Heatherwick offers both an informed critique of the inhumanity in most of today's contemporary building design and a rousing call for action Looking through Heatherwick's eyes we see familiar landmarks and cityscapes around the world from London Paris Barcelona Singapore New York Vancouver and beyond both old and new famous and obscure to learn how places can either sap the life out of us or nourish our senses and our psyche The time has come he says to put emotion back at the heart of the design process and the reasons to do so could not be more urgent Design is not superficial it has an impact upon economics climate change our mental and physical wellbeing even the peace and cohesion of our societies As citizens and users we need a world full of architectural diversity that delights and unites us And as makers and designers we can help create a world where cities reconnect with their essential mission to provide human spaces where people mix meet inspire each other and live out their full potential Elegantly crafted by Heatherwick's own studio and fully illustrated with hundreds of black and white photos Humanize is an urgent call to arms for making our world a better place for everyone to live and provides the vision and tools for us to make it a reality Wholeness Living M. Balige,2010-10-25 Wholeness Living is about recognizing the power that exists within us in others and in the Higher Power When these powers are in harmony we experience growth in the sense of physical health high self esteem high social interest and high optimism Therefore wholeness living is the openness to the truth about the relationship with the physical self the psychological self others and the Higher Power Based on years of clinical practice academic research and personal investigation Dr Bonaventura Balige's approach to leading a full rich and happy life focuses on four main areas the physical the psychological the social and the spiritual any one or more of which can be at the root of our difficulties In this book are lessons and heartfelt advice to help us address the issues interfering with our enjoyment of life While it is true that life is often difficult we have the tools to deal with any situation Dr Balige shows us that every person has the power to create the wholeness that can see us through the storms of life Every person can find happiness by following the steps explaining what wholeness living entails **The Quarterly Review** William Gifford,Sir John Taylor Coleridge,John Gibson Lockhart,Whitwell Elwin,William Macpherson,William Smith,Sir John Murray IV,Rowland Edmund

Prothero (Baron Ernle), George Walter Prothero, 1916 **The Living Age**, 1916 **Experimental Medicine** Claude Bernard, Among great men Claude Bernard should be counted fortunate in that he has not become a mythical figure Pasteur's discoveries are hardly more remarkable though their immediate influence has been much greater and his horizon was incontestably less broad But Bernard remains a plain man highly distinguished but not obscured by the growth of a legend His physiological researches may have immortalized his name but Experimental Medicine never exerted the influence which it promised What Bernard saw as the future of physiology remained for decades obscured so his writings were only half understood His influence however was exerted far beyond medicine Stewart Wolf suggests that Claude Bernard's genius in physiological experimentation is similar to the extraordinary Sherlock Holmes capacity to solve crimes and William Osler's uncanny abilities in clinical diagnosis Like both of those creative searchers Claude Bernard typically focused on findings that did not accord with prevailing theory His curiosity led him to attempt to explain the finding by a tentative hypothesis he would then devise an experiment Although he sought for a quantitative result that might serve as a basis of a theory he had little confidence in statistics as a guide to certainty Bernard's opposition scientists prevailing habit of segregating their inquiries into systems rather than studying the unified organism is particularly striking This volume will be important for those in the medical field as well as those interested in the history of science **Littell's Living Age**, 1916 **An Introduction to the Study of Experimental Medicine** Claude Bernard, 1927 First English translation of the classical work on the principles of physiological investigation in life sciences **Dialectical Encounters** Wilkinson Taraneh Wilkinson, 2019-04-04 Discussions of Islam in Turkey are still heavily dominated by political considerations and the dualistic paradigms of modern v traditional secular v religious Yet there exists a body of Muslim institutions in the country Turkish theology faculties whose work overcomes ideological divisions By engaging with Turkish theology in its theological rather than political concerns this book sheds light on complex Muslim voices in the context of a largely Western and Christian modernity Featuring the work of Recep AlpyaAYA l and Azaban Ali Dzgn this innovative study provides a concise survey of Turkish Muslim positions on religious pluralism and atheism as well as detailed treatments of both critical and appreciative Turkish Muslim perspectives on Western Christianity The result is a critical reframing of the category of modernity through the responses of Turkish theologians to the Western intellectual tradition **The Determined Spy** Douglas Waller, 2025-04-08 From Douglas Waller New York Times bestselling author of Wild Bill Donovan an intimate and expertly researched biography of little known early CIA leader Frank Wisner whose behind the scenes influence on Cold War policy and hundreds of highly secret anti Soviet missions resonates with the international crises we see today Frank Wisner was one of the most powerful men in 1950s Washington though few knew it Reporting directly to senior U S officials his work largely hidden from Congress and the public Wisner masterminded some of the CIA's most daring and controversial operations in the early years of the Cold War commanding thousands of clandestine agents around the world Following an early career

marked by exciting escapades as a key World War II spy under General William Wild Bill Donovan Wisner quickly rose through the postwar intelligence ranks to lead a newly created top secret unit tasked under little oversight with overseeing massive propaganda economic warfare sabotage subversion and guerrilla operations all over the world including such daring initiatives as the CIA backed coups in Iran and Guatemala But simultaneously Wisner faced a demon few at the time understood bipolar disorder When this debilitating disease resulted in his breakdown and transfer to a mental hospital the repercussions were felt throughout Washington s highest levels of power Waller s sensitive and exhaustively researched biography is the riveting story of both Frank Wisner as a national figure who inspired a cadre of future CIA secret warriors and also an intimate and empathetic portrait of a man whose harrowing struggle with bipolar disorder makes his impressive accomplishments on the world stage even more remarkable A6M Zero-sen Aces 1940-42 Nicholas Millman,2019-04-18 The Mitsubishi A6M Zero sen was Japan s Spitfire In continuous development and operational service from the time of the Sino Japanese war in 1940 to the end of the Pacific War in 1945 it is held in almost mythical awe similar to Britain s legendary fighter aircraft At the time of its operational debut the fighter s design features offered the revolutionary combination of an all round vision canopy cannon armament and a jettisonable drop tank giving it phenomenal range Together with the flying and tactical proficiency of superbly trained pilots this made the Zero sen a true strategic fighter spearheading Japan s offensive in the Pacific It was also the mount of a plethora of successful and flamboyant naval aces engaged in both sea and land campaigns This volume covers the use of the A6M2 variant from its debut in China to the Solomons Campaign and also tells the story of the A6M2 fighter aces of the 4th and Tainan Kokutai *Father's Love Journey* Fount Shults,2007-05 God sent his Son to draw mankind into his personal journey of love Jesus journey makes a full circle from his Father into the world and back to the Father He invites believers to join him as He returns Christian *Chance Encounters: Probability in Education* R. Kapadia,M. Borovcnik,2012-12-06 This book has been written to fill a substantial gap in the current literature in mathematical education Throughout the world school mathematical curricula have incorporated probability and statistics as new topics There have been many research papers written on specific aspects of teaching presenting novel and unusual approaches to introducing ideas in the classroom however there has been no book giving an overview Here we have decided to focus on probability making reference to inferential statistics where appropriate we have deliberately avoided descriptive statistics as it is a separate area and would have made ideas less coherent and the book excessively long A general lead has been taken from the first book in this series written by the man who probably more than everyone else has established mathematical education as an academic discipline However in his exposition of didactical phenomenology Freudenthal does not analyze probability Thus in this book we show how probability is able to organize the world of chance and idealized chance phenomena based on its development and applications In preparing these chapters we and our co authors have reflected on our own acquisition of probabilistic ideas analyzed textbooks and observed and reflect

ed upon the learning processes involved when children and adults struggle to acquire the relevant concepts Foundations of Biophilosophy Martin Mahner, Mario Bunge, 1997-05-20 Over the past three decades the philosophy of biology has emerged from the shadow of the philosophy of physics to become a respectable and thriving philosophical subdiscipline In their book the authors take a fresh look at the life sciences and their philosophy from a strictly realist and emergentist naturalist perspective They outline a unified and science oriented philosophical framework that enables them to clarify many foundational and philosophical issues in biology Thus this book should be of interest to both life scientists and philosophers and is suitable as a textbook for courses at the advanced levels as well as for independent study **Free Day** Inès

Cagnati, 2019-12-03 A haunting and powerful portrait of a young French girl and her desire to escape the world in which she is born without losing her identity In the marshy countryside of southwestern France fourteen year old Galla rides her battered bicycle twenty miles twice a month from the high school she attends on scholarship back to her family's rocky barren farm Galla's loving overwhelmed mother would prefer she stay at home where Galla can look after her neglected little sisters and defuse her father's brutal rages What does this dutiful daughter owe her family and what does she owe her own ambition In Inès Cagnati's haunting and visually powerful novel Free Day winner of the 1973 Prix Roger Nimier Galla makes an extra journey one frigid winter Saturday to surprise her mother As she anticipates their reunion she mentally retraces the crooked path of her family's past and the more recent map of her school life as a poor but proud student Galla's dense interior monologue blends with the landscape around her building a powerful portrait of a girl who yearns to liberate herself from the circumstances that confine her without losing their ties to her heart **PEOPLE OF THE STATE OF MICHIGAN**
