Radio Navigation Systems for Airports and Airways Oleg Nicolaevich Skrypnik, 2019-03-29 This book highlights the design principles of ground based radio navigation systems used in solving navigation tasks in the airfield and on air routes Mathematical correlations are illustrated that describe its operation peculiarities of disposition main technical characteristics generalized structural diagrams as well as the inter operation with onboard equipment Examples of building construction functional diagrams and characteristics of Russian made radio navigation systems are discussed This book is written for students of electronics and aviation disciplines It can also be useful for aviation specialists as well as for those interested in air radio navigation

Cognitive Infocommunications, Theory and Applications Ryszard Klempous, Jan Nikodem, Péter Zoltán Baranyi, 2018-08-25 The book gathers the chapters of Cognitive InfoCommunication research relevant to a variety of application areas including data visualization emotion expression brain computer interfaces or speech technologies It provides an overview of the kind of cognitive capabilities that are being analyzed and developed Based on this common ground it may become possible to see new opportunities for

synergy among disciplines that were heretofore viewed as being separate Cognitive InfoCommunication begins by modeling human cognitive states and aptitudes in order to better understand what the user of a system is capable of comprehending and doing The patterns of exploration and the specific tools that are described can certainly be of interest and of great relevance for all researchers who focus on modeling human states and aptitudes This innovative research area provides answers to the latest challenges in influence of cognitive states and aptitudes in order to facilitate learning or generally improve performance in certain cognitive tasks such as decision making Some capabilities are purely human while others are purely artificial but in general this distinction is rarely clear cut Therefore when discussing new human cognitive capabilities the technological background which makes them possible cannot be neglected and indeed often plays a central role This book highlights the synergy between various fields that are perfectly fit under the umbrella of CogInfoCom and contribute to understanding and developing new human artificial intelligence hybrid capabilities These merged capabilities are currently appearing and the importance of the role they play in everyday life are unique to the cognitive entity generation that is currently growing up
