Underwater Operations Louis Rey,2012-12-06 Opening Speech of the ICEDIVE 84 Conference by His Royal Highness
Prince Bertil of Sweden I am very pleased to be invited to open the International Conference ICEDIVE 84 dealing with
medical and technical problems of diving and related underwater activities in arctic conditions Until recent times the arctic
was considered astrange and remote area of minor importance However in a world with diminishing natural resources arctic
areas have become a region of global importance because of their enormous resources and strategie position Certain experts
believe that more than 50% of oil reserves are sleeping in these northern areas which are cold harsh and hostile to man
Operations in arctic areas are extremely difficult expensive and demand high levels of technical scientific and physiological
achievement One should recall for example that Alaskan oil investment only became economically viable after the 1973 1974
price explosion Recent political military troubles in the Gulf have increased interest in the development of polar resources
This conference is unique as it is the first time that medical and technical specialists interested in the problem of diving in
arctic conditions have met in an international forum Development of the arctic resources is a matter of international urgency
and it pleases me that scientists from the USA Canada the USSR Australia and Europe have gathered here in Stockholm to
present their experience and to discuss problems in this field The American Catalogue ,1891 *Oxford Desk Reference:*
