

Tiny Homes

Over the past 70 to 80 years, the household lifestyles of middle class Americans have been getting increasingly more extravagant. In 1949, the average size of a single-family home was 909 square feet. By 2021, the average size of an American single family home had reached 2,480 square feet! But even \$60,000 is a fraction of what people are paying for single family real estate in many areas of the country.

The decision to go tiny requires some radical self-evaluation. What do people really need to live comfortably? In many areas of the world, people still live far simpler lives than those lived by Americans, who are continually assaulted on television, radio, and social media with advertisements designed to make them think they need more and more personal belongings to be happy. In reality, the basic needs of a human
