## **Sample Documentation Of Mung Seeds Experiment:**

**Pesticides Documentation Bulletin** ,1967      Yielding profits? Low adoption of an improved mung bean seed variety in Southern Bangladesh de Brauw, Alan,Kramer, Berber,Murphy, Mike,2020-11-19 Agricultural technology adoption is an important driver of rural poverty reduction We study take up of a specific technology BARI Mung 6 BM6 an improved mung bean seed variety among smallholder farmers in the southern region of Bangladesh In contrast to agronomic studies on BM6 performance under highly controlled conditions we focus on performance of this variety for farmers who are growing outside of the context of an agronomic field trial We find no evidence of higher performance in this uncontrolled environment we do not observe statistically significant differences in output or yields between farmers planting BM6 and those planting local varieties We do however observe a significant positive association between BM6 use and yields among farmers who report applying seeds within recommended guidelines Using a simple model we illustrate that modest uncertainty around the required quantity of seed per unit area of land can substantively impact the profitability of BM6 seeds for smallholders in our study context Our findings highlight the importance of providing adequate extension information along with improved technologies to encourage adoption and ultimately improve farmer welfare
