## EVOLUTION OF SPORTING EQUIPMENT – FROM ANCIENT TIMES TO TODAY – EXAMPLE OF OLYMPIC GAMES

Sport is all present in modern times. People in different ways are engaged in sports and exercise. Each sport includes particular equipment that is specific to it. So it was in the ancient times. People were sporting or just watching. But every sport involved sports equipment, as well as certain rules. In ancient times men were mainly engaged in sports, and in many competitions women were prohibited from participating. The age categories appear somewhat later, while the weight categories in martial sports were not at all. Today, this is not so, there are many categories in every sport, both according to age and weight. Many ancient sports exist today. We cannot say they are exactly the same, because, like everything, so does sport change over time. There are changing rules, modernizing the props, and changing views and attitudes about the role of sports in society. The period of almost 2000 years is too great for sports to not develop and change in it. This essay analyzes the Olympic Games and sports that were held on them in the ancient times. Some of the sports compared across times will be throwing a disc, running, long jump, throwing spears, wrestling, boxing and so on. Many of these sports exist today and, among them, some have almost never changed, while in other changes are very pronounced.

Throwing a disc is a sport that has not changed much in time. What changed the most is its size, i.e. disk weight and material from which it is created. Running is very popular today, and there are many disciplines. In addition to professional sports, people run leisure, it has become one of the most intricate forms of recreation. In ancient times, there were also several racing disciplines, and what is most different from today's professional running is the starting mechanism. A long-range jump is being carried out in the modern era without any tools, while the Greeks considered it difficult to carry it out without anything, and used the weights to prolong the jump. Throwing the spear was not without tools. Here the Greeks used a special technique of throwing a spear with the help of a band called ankyle. It gave an additional thrust, with the spear, similar to that of the sling. Fighting sports have changed a lot, i.e. they were much more violent than today, because they did not have a time constraint, nor did they have a lot of restrictive rules. In addition, there was no ring in the ancient era, which would enclose the space for a sporting fight. Wrestling did not change much in its essence; The goal was and remained to dominate by the opponents by the power of the body and movement. But the difference is that the fight in Greece ended when a fighter of another collapsed three times on the floor or if one would give up the continuation of the fight. Today, the fighting often ends when the rounds are completed and the referee scores the winner by scoring. Boxing is a sport that constantly develops and its rules constantly change. In Greece, it was known as the most violent sport, but today it no longer holds that title. The difference is in gloves that were used once and now. Nowadays gloves are used, while the first gloves in Greece

*English Writing skills (paragraph, essay, notice, article, report)* Tripti singh , English Writing skills paragraph essay notice article report **The Sterling Book Of Paragraph To Essay Writing** M. Sarada, 2003-10-01 **Essays in Financial Economics** Francisco Jose Guedes dos Santos, 2011 This dissertation consists of three essays that examine various problems in financial economics Chapter 1 fills in a gap in the IPO literature by documenting a close connection between IPO underpricing and the long term underperformance of IPOs Firms going public in periods of low underpricing do not underperform in the long run while firms going public in high underpricing periods do Furthermore IPOs in later stages of high underpricing periods underperform even relative to their offer prices which suggests that many of the most underpriced IPOs are in fact priced above fundamental value This result is unlikely to be explained by differences in risk or to be driven by a peso problem I also find that firms going public in later stages of high underpricing periods display worse operating performance and profitability lower asset growth lower investment rates and higher cash holdings Finally I provide evidence that investor sentiment is stronger in high underpricing periods These results are consistent with a setting in which low quality firms in periods in which the average underpricing in the market is high try to exploit investors sentiment by going public Chapter 2 looks at the return predictability information in Single Country Closed End Fund SCCEF discounts It is long argued that discounts in closed end funds are caused by differences in sentiment between investors that trade the fund and investors that trade the underlying assets SCCEFs provide an interesting setting given the clear market segmentation American SCCEFs are priced by American investors while underlying assets are mainly traded by investors in the respective country I argue that if cross sectional and time series variation in SCCEFs are linked to differences in sentiment then the SCCEF discount can be used to predict future performance of SCCEFs international stock markets or both The evidence on international stock markets return predictability using SCCEF discounts is mixed A trading strategy designed to exploit potential differences in sentiment by buying and selling international stock indices delivers alphas of around 90bps per month in an International CAPM Adding three extra factors value size and momentum in U S equity does not change the result However once we control for international value and momentum in stock markets we no longer observe positive alphas for short horizon investments The evidence on SCCEF return predictability from SCCEF discounts is very strong For all three asset pricing models considered a strategy that exploits differences in sentiment yields positive alphas with magnitudes ranging from 2% to 4% per month In Chapter 3 I investigate how the stock market reacts to earnings surprises announced during major sport events in the U S In a rational and frictionless market investors should not react differently to announcements released during sport events However major sport events combine two known psychological biases First sports can be distracting impairing investors judgment Second sports can change people s mood Hence through these biases market prices could be affected Considering the Super Bowl World Series of Baseball and NBA finals I find that investors

immediately after sport events underreact to positive surprises and overreact to negative surprises in earnings After this initial reaction I find that investors undo their mistakes in the following weeks to the announcement However for the most negative and positive surprises they over compensate In this study I show that non relevant financial events have an impact on market prices Moreover I show that the observed impact cannot be explained only by limited attention as investor mood seems to be crucial to explain investors reactions

Reflective Faith Austin Farrer, 2012-06-13 In the foreword to this collection of essays the noted British philosopher of religion John Hick aptly describes the style and tone to be found in Reflective Faith Farrer asks the right questions and thereby puts philosophical theology on the right road This collection constitutes an introduction to Farrer s thought such as many have wished for and it will be important also for those who are concerned to study Farrer s work as a whole And that work Hick adds is so far removed from the realm of unanalyzed slogans vague metaphors and all form of sloppiness and imprecision that to read someone of Farrer s stature is to lose any taste for the lower levels of theological writing Reflective Faith spans Farrer s long

career at Oxford and includes essays taken from lectures papers and broadcast talks presented during those years Originally written for select and usually small audiences they display a warmth and spontaneity that enables readers to draw close to Farrer and in so doing to appreciate his breadth of scholarship and wit Here is traced the evolution of Farrer s thought from its early origins in scholastic theology to his eventual movement towards the philosophy of action Also included are study notes provided by the editor and a bibliography of Farrer s published works
