Nikon System Handbook Bruce Peterson, Moose Peterson, 1991

Nikon System Handbook B. Moose Peterson, 1996

Here is the authoritative text on the Nikon SLR system covering the entire line from its introduction in 1959. Describes every body lens flash and accessory from Nikon. Over 50 000 copies in earlier editions. *The Backpacker's Photography Handbook* Charles Campbell, 1994

Whether you're on an afternoon hike or scaling the Himalayas, backpacking adventures are ideal for taking spectacular pictures. This book covers all the rigors of living and photographing outdoors, from protecting equipment to shooting on the move. *The Advanced Nikon System* Michael Huber (Ph. D.), 1993 *Horn of Darkness* Carol Cunningham, Joel Berger, 2000

The black rhino is nature's tank, feared by all animals. Even lions will break off a hunt to detour around one. And yet the black rhino is on the edge of extinction, its numbers dwindling from 100 000 at the turn of the century to less than 2 500 today. The reason is that in places like Yemen, China, Korea, Taiwan, and Thailand, the rhino's horn is more valuable than gold, so valuable that people will risk their lives to harvest it. To deter rhino poachers, African governments have spent millions on helicopters, paramilitary operations, fences, and guard dogs, even relocation to protected areas. Finally, Namibia decided to dehorn its rhino population in a last ditch effort to stop the slaughter. In 1991, Carol Cunningham and Joel Berger and their eighteen-month-old daughter, Sonja, went to Namibia to weigh the effects of dehorning on rhinos. In *Horn of Darkness*, they tell the story of three years in the Namib Desert studying Africa's last sizable population of free-roaming black rhinos. This is the closest most readers will come to experiencing life in the remaining wilds of Africa. Cunningham and Berger's writing captures what it is like to leave the comforts of civilization to camp for months at a time in a land filled with deadly predators to study an animal that is reclusive, unpredictable, and highly dangerous. The authors describe staking out water holes in the dead of the night, creeping to within twenty-seven meters of rhinos to photograph them, all the while keeping a lookout for hyenas, elephants, and lions. They recount many heart-pounding escapes: one rhino forces Carol Cunningham up a tree; an unseen lion in hot pursuit of hyenas races right past a frozen Joel Berger and captures the adrenaline rush of inching closer to a rhino that might flee or charge at any moment. They also give readers a clear sense of the careful, patient work involved in studying animals, the frustration of long days without finding rhinos or seeing other people coping with heat and thirst. The Namib Desert is one of the driest on Earth, with dirt and insects driving hundreds of kilometers in a Land Rover packed to capacity, slowing amassing records on one hundred individual rhinos over the course of several years. And perhaps most important, the authors reveal that the data they collected suggests that the dehorning project might backfire: that in the four years after dehorning began, calf survival was down. The evidence suggests that hyenas might be preying on calves, and the hornless mothers couldn't defend their offspring. They also describe the dark side of scientific work: from the petty jealousy of other scientists to outside researchers who were often seen as ecological imperialists to the controversy that erupted after the authors published their findings as furious officials of the Namibian

conservation program denounced their findings and through delays and other tactics effectively withheld a permit to allow the couple to continue their study Weaving together the historical accounts of other naturalists a vividly detailed look at life in the wild and a behind the scenes glimpse of scientific work and the dark side of the conservation movement Horn of Darkness is destined to be a classic work on the natural world Popular Photography ,1999-02 **Nikon AF Speedlight Flash System** Simon Stafford,2005 Nikon manufactures some of the most sophisticated accessory flash equipment found in today s marketplace and the Magic Lantern Guide shows photographers exactly how to master the complex equipment and operating modes of the company s AF Speedlight Flash System That s why it s destined to be the most often used reference on photographic flash technique From advice on Multi sensor balanced fill flash bounce flash rear curtain sync to high speed sync or multiple flash set ups this manual explains everything It comes complete with a course on the basics of flash handling specialized flash technique and a model by model review of using current flash gear with Nikon cameras Popular Photography ,1994-12 **Popular Photography** ,1990-11 **Popular Photography** ,1991-01 **McBroom's Camera Bluebook, 1994 Edition** Michael McBroom,1993 The most complete and authoritative price and buyer s guide for new and used camera equipment The cameras and accessories featured are the ones people most often buy so this is not just for the specialist collector but provides a reference suitable for anyone interested in cameras and photography **Popular Photography** ,1991-01 **Popular Photography** ,1991-01 Popular Photography ,1993-11 **Industrial Photography** ,1994 **Popular Photography** ,1992-10 **Popular Photography** ,1994-01 **American Photo** ,1999-05 *American Photo* ,1991-07 Popular Photography ,1991-01
