University? Sibongile Muthwa, Denver A. Webb, 2024-08-20 South Africa's higher education sector is rooted in the country's divided past A significant State driven restructuring from around 1997 to 2005 resulted in what is largely the current configuration of public universities But just over two decades later for a variety of reasons the higher education sector in South Africa appears beset with numerous challenges Nelson Mandela University is one of the public universities that emerged from the restructuring process The university is in an ongoing state of evolution of becoming It developed out of the amalgamation of the University of Port Elizabeth Port Elizabeth Technikon and incorporation of the Port Elizabeth campus of Vista University as Nelson Mandela Metropolitan University in 2005 In 2017 it was renamed Nelson Mandela University after the world renowned statesman rather than the metropolitan area in which the university is primarily located The renaming was conceptualised as more than a marketing opportunity to rebrand the university but as an opportunity to reorientate the

university to reposition Nelson Mandela University as an engaged and socially embedded university in the service of society striving to be the academic expression of the values and ethos of its iconic namesake Endeavouring to be something greater and different from the norm imbues its strategy public statements and practices The determination to achieve Mandela University serves or is intended to serve as both an organising principle and a lodestar A cross section of writers from different backgrounds situates Nelson Mandela University within the contemporary historical moment from which it emerged and examines its subsequent evolution While Nelson Mandela University has performed the usual work expected of any university it has also sought to turn the university outwards to achieve a higher purpose framing itself as a values based university on a journey to become something else In Achieving Nelson Mandela University the university attempts to give an account of itself The book is an intellectual and scholarly reflection on where the university has come from and where it is seeking to go

to emerging perspectives as an increasing range of countries engage in the process of internationalization. The pressure to internationalize cannot be ignored by institutions anywhere in today's world yet the dominant paradigms in the conception of internationalization traditionally come from the English speaking world and Western Europe. This book sets out to offer alternative viewpoints. Different dimensions and interpretations of internationalization in countries and regions whose perspectives have received little attention to date provide food for thought and help to broaden understanding of its application in alternative contexts. Combining diverse perspectives from around the world, this new volume in the Internationalization in Higher Education series seeks answers to key questions such as: What are the main characteristics of internationalization viewed from different cultural and regional backgrounds and how do they differ from traditional models such as in Western Europe, North America and Australasia? What issues in different global contexts have an impact on internationalization processes? What are the key challenges and obstacles encountered in developing innovative and non-traditional models of internationalization? With contributions from world renowned international authors and perspectives from countries and contexts seen only rarely in the literature, *The Globalization of Internationalization* offers distinctive overviews and insights while exploring a range of thematic and regional issues arising from these considerations. This will be essential reading both as an academic resource and a practical manual for university leaders, academics, higher education policy advisers and non-governmental organizations which fund higher education.

Contextualising Rural Education in South African Schools, 2023-04-03

South Africa's democratic government inherited a divided and unequal system of education. Under apartheid, South Africa had nineteen different educational departments separated by race, language, geography and ideology. This education system prepared learners in different ways for the positions they were expected to occupy in social, economic and political life under apartheid and was funded and resourced in ways that favoured white people and disadvantaged black people who remain in the working class. The newly elected democratic government in 1994 laid a foundation for a single national education system. Twenty-five years after the dawn of democracy, education is still in a parlous state in many communities in South Africa, but it is in the rural areas, mainly in the former homelands, that learners are most disadvantaged.

Transforming Universities in South Africa, 2020-08-31

The idea of transformation in higher education underpins all policy documents, academic literature and on-going debates in

South Africa Transforming Universities in South Africa Pathways to Higher Education Reform responds to the pressing need to comprehensively review the post apartheid experience and assess where South Africa s higher education stands across the continent and globally particularly within the country s efforts to overcome decades of socio economic imbalances It addresses the question of whether South Africa s transformation strategy from apartheid to democracy was simply a symbolic new flag raising and new anthem singing exercise reflecting a transition akin to those limited decolonization projects elsewhere in the world or whether something more fundamental was possible and was achieved with political and policy implications for other countries in Africa and globally This volume s ultimate purpose is to provide a basis for imagining new futures in which South Africa higher education in the context of Africa and the global world takes centre stage
