Integral Green Zimbabwe Elizabeth Mamukwa, Ronnie Lessem, Alexander Schieffer, 2016-05-23 *Integral Green Zimbabwe An African Phoenix Rising* by Ronnie Lessem Alexander Schieffer and Liz Mamukwa is the first book in the Integral Green Society and Economy series a series which has three overarching aims The first aim is to link together two major movements of our time one philosophical the other practical The philosophical movement is towards what many today are calling an integral age while the practical is the green movement duly aligned with that of sustainable development The second is to blend together elements of nature and community culture and spirituality science and technology politics and economics thus serving to bring about an integral green vision albeit with a focus on business and economics As such the authors transcend the limitations to sustainable development and environmental economics which are overly ecological if not also technological in orientation and exclude social and cultural elements Thirdly this particular volume focuses specifically on Zimbabwe as well as Southern Africa drawing on the particular issues and capacities that this country and region represents The emphasis on Zimbabwe and Southern Africa transpired not only because two of the editors Lessem and Mamukwa are Zimbabwean in origin but because Zimbabwe is today like a phoenix rising from the ashes and has the opportunity to recreate itself anew

Integral Knowledge Creation and Innovation Elizabeth Mamukwa, 2020-07-27 This work focuses on the creation of new knowledge and how this has happened throughout all ages as far back as the time of ancient philosophy to today A product of integral research it covers the process of creating new knowledge leveraging existing knowledge sometimes resulting in cutthroat innovations It also includes knowledge systems such as conventional university systems to Mode 2 university concepts culminating on integral research to innovation This book will help the reader to realise that the subject of knowledge creation is no longer business as usual

Many innovations have been created for human benefit in general but such innovations may have benefited only parts of society. The challenge in the world is that while new innovations may be brilliant there are sections of society who continue to slip into poverty. Modern innovators must also consider such communities and come up with appropriate interventions. This book will open the eyes of innovators to new possibilities. In addition, the subject of knowledge should not be an elitist affair. One may stand to gain a lot by seeing the knowledge in other people whatever their station in life. This realisation can enable serious innovators to widen their scope in terms of the sources of existing knowledge which can be improved and reassessed as new knowledge. Such existing knowledge can be identified by engaging the very communities that may be affected by a problem or challenge. Such communities will have had time to interrogate their situations and think of possible solutions to such though they might not have the economic capacity to implement such solutions. This is always a useful starting point if one is seeking a solution to a community problem. This book will be useful to students interested in the subject of knowledge and innovation from under graduate to PhD level. It will also benefit captains of industry, executives and managers who are interested in improving their knowledge improvement cycles in their companies.

The Routledge Handbook of Disability in Southern Africa Tsitsi Chataika, 2018-07-27. This comprehensive ground breaking southern African centred collection spans the breadth of disability research and practice. Reputable and emerging scholars together with disability advocates adopt a critical and interdisciplinary stance to prove challenge and shift commonly held social understanding of disability in traditional discourses, frontiers and practices in prominent areas such as inter national development, disability studies, education, culture, health, religion, gender, sports, tourism, ICT, theatre, media, housing and legislation. This handbook provides a body of interdisciplinary analyses suitable for the development of disability studies in southern Africa. Through drawing upon and introducing resources from several disciplines, theoretical perspectives and personal narratives from disability activists, it reflects on disability and sustainable development in southern Africa. It also addresses a clear need to bring together interdisciplinary perspectives and narratives on disability and sustainable development in ways that do not undermine disability politics advanced by disabled people across the world. The handbook further acknowledges and builds upon the huge body of literature that understands the social, cultural, educational, psychological, economic, historical and political facets of the exclusion of disabled people. The handbook covers the following broad themes: Disability inclusion, ICT and sustainable development, Access to education from early childhood development up to higher education, Disability employment, entrepreneurship and community based rehabilitation, Religion, gender and parenthood, Tourism, sports and accessibility. Compelling narratives from disability activists on societal attitudes toward disability, media advocacy, accessible housing and social exclusion. Thus, this much awaited handbook provides students, academics, practitioners, development partners, policy makers and activists with an authoritative framework for critical thinking and debates that inform policy and practice in incomparable ways with the view to promoting inclusive and sustainable development. *Integral Ubuntu*
