

WATER POLLUTION

About 71 percent of the Earth's surface is water-covered, and the oceans hold about 96.5 percent of all Earth's water. Water also exists in the air as water vapor, in rivers and lakes, in icecaps and **glaciers**, in the ground as soil moisture and in aquifers. Water is never sitting still due to **water cycle**, our planet's water supply is constantly moving from one place to another and from one form to another. As a result of human activities water contamination happens. Water pollution results when **contaminants** are introduced into the natural environment. For example, releasing inadequately treated **wastewater** into natural water bodies can lead to **degradation** of aquatic ecosystem.

In our country, Philippines, is always at risk due to its geographic distribution of its 7,107 islands in Southeast Asia in the western Pacific. The country is surrounded by water: the Luzon Strait, the South China Sea, the Sulu Sea, the Celebes Sea and the Philippine Sea. According to the United Nations, uncontrolled, rapid population growth has contributed to extreme poverty, environmental degradation and pollution in the Philippines. Currently water pollution is becoming a major problem in the Philippines. According to Water Environment Partnership in Asia (WEPA), 32 percent of the Philippines' land mass approximately 96,000 square kilometers is used for agriculture. The primary crops are palay (rice), corn, sugar cane, fruit, root crops, vegetables and trees. Hence, water pollution will be a major threat for these livelihood of Filipinos.

According to **Greenpeace**, the water pollution in the Philippines has been due to many factors. Most commonly is wastewater from the industrial activities of different stakeholders. The metal varies according to industry like lead, mercury, chromium, cadmium and cyanide. Agricultural activities with the use of organic substances like decayed plants, dead animals, livestock manure, soil runoff; and non-organic materials like pesticides and fertilizers. Dumping of domestic sewage which contains pathogens that threaten human health and life. And other sources like oil, mine or chemical spills and illegal dumping in or near water.

In 2010, the government of the Philippines developed a road map to achieve universal water and sanitation services coverage by 2028. **Water.org** is working to support this goal. In the Philippines and around the world, people are navigating the COVID-19 pandemic, and millions are striving to endure this crisis with an added challenge. They lack access to life's most critical resource – water. Now more than ever access to safe water is critical to the health of families in the Philippines. Sustainable solutions were formulated by the Greenpeace Philippines which is the concept of Clean Production. The concept of producing consumer goods in this way entails:
