## Social Problem Research Paper - 100 points (Approximate due date: \_\_\_\_\_)

Through our investigation of conflict in novels, short stories, and plays, we have met with many types of problems. The range from disagreements between small groups to large scale plans of violent action. While we act as witnesses through the pages of our texts, we remain detached from each issue. It is time for this to change!

**What are you going to do about it?**

You will select a **current social problem** of your choice (all topics must gain teacher approval before work can begin) and you will learn to consult a variety of sources to learn more about this important issue and **persuade** readers to agree with your proposed solution.

The goal of this paper is to help you become a better writer and to introduce you to writing and research formats that will follow you through your high school career. Each step in the process is important, so be sure to keep this packet and all materials safe.

### P.O.W.E.R. Writing Model:

We will work together in small steps to put together your research paper. The steps are as follows:

#### PLANNING- 20 pts

You will conduct preliminary research about topics of interest at the Carlynton Library and on computers, and you will brainstorm to generate ideas to select a topic.

#### ORGANIZING- 10 pts

Once you have ideas, you will come up with a thesis statement and three supportive topics. You will also create an outline to help you visualize your paper with transitions.

#### WRITING- 20 pts

You will formulate a **rough draft** that follows the five-paragraph format. Your draft will include valuable quotes and information from sources with citations.

#### EDITING- 10 pts

You will use evaluation comments from the teacher and your peers to make changes and corrections to your work. If needed, you will complete any follow-up research and finalize your revised cited page.

#### REWRITING - 40 pts

You will rewrite your paper and submit your work for a final grade. This final copy will show off your hard work and focus and must include a cover page and works cited page.

You will submit work for a grade at various steps along the way to check-in on progress and comprehension.

**PLEASE REMEMBER:** If at anytime you have questions or concerns, **please ask!** The research paper may be difficult to create, but the process should be easy because we will take it one step at a time. I am here to help you do the very best you can and to feel proud about your work!

**Mathematical Problem Solving and New Information Technologies** Joao P. Ponte, Joao F. Matos, Jose M. Matos, Domingos Fernandes, 2013-06-29 A strong and fluent competency in mathematics is a necessary condition for scientific technological and economic progress However it is widely recognized that problem solving reasoning and thinking processes are critical areas in which students performance lags far behind what should be expected and desired Mathematics is indeed an important subject but is also important to be able to use it in extra mathematical contexts Thinking strictly in terms of mathematics or thinking in terms of its relations with the real world involve quite different processes and issues This book includes the revised papers presented at the NATO ARW Information Technology and Mathematical Problem Solving Research held in April 1991 in Viana do Castelo Portugal which focused on the implications of computerized learning environments and cognitive psychology research for these mathematical activities In recent years several committees professional associations and distinguished individuals throughout the world have put forward proposals to renew

mathematics curricula all emphasizing the importance of problem solving In order to be successful these reforming intentions require a theory driven research base But mathematics problem solving may be considered a chaotic field in which progress has been quite slow      **Assessment Strategies for Cognitive-Behavioral Interventions** Philip C.

**The Mathematics Curriculum, 9-12** Donald L. Chambers, 1980      **Research in Collegiate Mathematics Education II** James J. Kaput, Ed Dubinsky, Alan H. Schoenfeld, 1996 The field of research in collegiate mathematics education has grown rapidly over the past 25 years Many people are convinced that improvement in mathematics education can only come with a greater understanding of what is involved when a student tries to learn mathematics and how pedagogy can be more directly related to the learning process Today there is a substantial body of work and a growing group of researchers addressing both basic and applied issues of mathematics education at the collegiate level This second volume in Research in Collegiate

Mathematics Education begins with a paper that attends to methodology and closes with a list of questions The lead off paper describes a distinctive approach to research on key concepts in the undergraduate mathematics curriculum This approach is distinguished from others in several ways especially its integration of research and instruction The papers in this volume exhibit a large diversity in methods and purposes ranging from historical studies to theoretical examinations of the role of gender in mathematics education to practical evaluations of particular practices and circumstances As in RCME I this volume poses a list of questions to the reader related to undergraduate mathematics education The eighteen questions were raised at the first Oberwolfach Conference in Undergraduate Mathematics Education which was held in the Fall of 1995 and are related to both research and curriculum This series is published in cooperation with the Mathematical Association of America
