**Asst. Prof. Mohammed Nasser Abdulsada**

College of Basic Education/ Wasit University/ mohmednasser@rocketmail.com

**Abstract:** Most fourth-year university students of English in Iraqi academia encounter difficulties in writing research papers, for they are not well-guided as far as research writing is concerned. They are required to write papers without studying or identifying the procedures of writing papers and thus research writing is an entirely practical, rather than theoretical, subject in the fourth-level. This creates a problem for those students as they are unable to write good papers and the result is poor papers. The present paper sheds light on this problem. It reveals the current status of undergraduate research in the fourth-level, suggests the teaching of research as a subject in the fourth-level, indicates the objectives of this move, proposes a methodology for research paper writing, lays down a model examination sheet to examine and evaluate students' papers and then states a few recommendations. The study is based on a questionnaire set to a sample of Fourth-year students of English to find out the difficulties and obstacles of undergraduate research writing faced by those students.

**Key Words:** Undergraduate research, Research writing, Researching skills, Academic writing, EFL learning and teaching.

## **1. Introduction**

Conducting research can be a powerful experience for students. Its benefits, however, often end when the student submits a paper seen only by the instructor (Adams, 2004:116). The paper probably languishes in the instructor's office and is not shared with others. Reported benefits for students include increased research awareness and enthusiasm, improvement of professional presentation and self-evaluation skills, and promotion of active learning and collaboration with peers and professors (Hollander, 2002:103).

Fourth-Year University Students in Iraqi academia of English are required to write research paper at the fourth-level, known as "undergraduate paper." (Henceforth, UR). The approach often followed in this process is to give those students topics to write. Students have to choose a topic, develop it, write draft papers, present these draft papers for review by the supervisor and the students are examined, after all
