

Robertshaw®

The Robertshaw® 700-800 Series gas controls are bleed gas-controlled diaphragm valves.

The 700-800 thermocouple type diaphragm valves are most commonly used on commercial water heating equipment in conjunction with the 1352 (CWH-3) bleed gas temperature controllers.

The 700-800 thermopile type diaphragm valves are most commonly used in commercial cooking applications in conjunction with the 4290 (GS) gas controls.

The 700-800 Series gas valves feature an automatic pilot valve bleed gas operator, inlet and outlet screens, manual gas cock valve, pilot adjusting key (under cap), pilot gas filter and pressure regulator (optional by model).

Regulated models offer the additional feature of straight line pressure regulation allowing application of the 700 diaphragm gas valves to a wide range of capacity requirements without regulator adjustment.

HIGH CAPACITY VALVE

INSTALLATION INSTRUCTIONS

Turn off gas supply to the equipment before servicing.

PIPING

1. Pipe or tubing must be clean and free of scale and dirt.
2. Make sure gas piping is pressure tested before control is connected. High pressure can damage control causing a hazardous condition. Do not subject control to more than 1/2 PSI inlet pressure.
3. If it is not already installed, a drip leg (sediment trap) must be added to the gas supply line to the control. (See figure below.) All piping must comply with local codes and ordinances and with National Fuel Gas Code (ANSI Z233.1 / NFPA, No. 54).

4. Using pipe thread compound suitable for gas being used, apply a small amount on the male pipe threads. (Do not use Teflon tape or Teflon compound.) Leave the first two threads clean. Never use compound on female threads as it might be pushed into the control body.
5. The gas valve is multiposition and can be mounted in any position (except upside-down) without affecting its operation.
6. Install gas valve so gas flow conforms with gas flow arrow on bottom of control.
7. **DO NOT** insert any object other than suitable pipe or tubing in the inlet or outlet of this control, internal damage may occur and result in a hazardous condition. A back-up wrench should only be used on the wrench boss provided for this purpose (see drawing above right), never on body of the control, as this could distort the casting. **NOTE:** Do not overtighten any pipe connections, as this could crack the valve body. A valve with a cracked valve body will not be warranted.

INSTALLATION DATA 700-800 SERIES COMMERCIAL GAS VALVE

STANDARD CAPACITY VALVE

CAUTION

THIS DEVICE SHOULD BE INSTALLED BY A QUALIFIED TECHNICIAN WITH DUE REGARD FOR SAFETY AS IMPROPER INSTALLATION COULD RESULT IN A HAZARDOUS CONDITION.

PILOT LINE AND BLEED LINES

Make sure tubing is free of burrs and dirt. Connect pilot tubing into control using fitting provided and tighten for gas seal. Do not bend tubing after tightening. Bleed lines must be connected into control as shown below.
