

# Manual cleaning and disinfection of instruments

**1.** Put on liquid-tight protective aprons, protective goggles and nose and mouth protection (or full visor masks). Put on protective gloves with long cuff.

**2.** Fill instrument tray with cold water and clean with a cleaning agent (if necessary, combination product cleaning agent / disinfectant) according to manufacturer's specifications. Carry out any necessary brush cleaning beneath the surface of the water. Intermediate rinse (drinking water quality). Clean instruments that are not clean one more time.

**3.** Measure the disinfectant using a suitable dosing system and place in a second instrument tray with cold water. For powder products, wait for the agent to dissolve and follow the manufacturer's instructions.

**4.** The solution is mixed by inserting the sieve insert.

**5.** Place instruments in the solution while open and make sure that they are completely covered and free of air bubbles.

**6.** Close bottom.

**7.** Wait for the exposure time specified by the manufacturer. Caution: The exposure time starts with the last instrument set down.

**8.** Thoroughly rinse instruments under running, cold water (at least drinking water quality, preferably DI water).

**9.** Dry with germ-free, lint-free cloths. Visually inspect instruments for cleanliness and integrity. Continue to reprocess (maintain, package, sterilize) the instruments as required.
