Role of the Transcriptome in Breast Cancer Prevention Jose Russo, Irma H. Russo, 2012-11-07 This book will provide the latest advances in molecular and cellular biology for establishing the foundation of a complete understanding of the mechanisms of breast differentiation leading to cancer prevention The authors are based on the epidemiological evidence indicating that early first full term pregnancy is a protective factor in human against breast cancer and they have used this paradigm and developed experimental systems in both in vivo and in vitro that have demonstrated mechanistically how the differentiation at the organ and cellular level takes place This knowledge has provided the blueprint for developing better understanding of the basis of cancer prevention The transcriptoma analysis of the breast of pre and post menopausal women has established a genomic signature imprinted in the breast that differs according to the reproductive history of the woman showing that early first full term pregnancy reprogram the organ This reprogramming takes place at the chromatin level by changing the transcriptional process The modification of the transcriptional control is due to the expression of non coding RNA sequences and posttranscriptional control driven by the spliceosome The plasticity of the genome of the human breast make possible this reprogramming that is not only induced by the physiological process of pregnancy but by the use of hormones that mimic pregnancy without pregnancy The author have established the basis of clinical trials for prevention and the discovery that short 15aa peptides of the chorionic gonadotropin hormone can be used in human breast cancer prevention based on preclinical and clinical data

The Future of Prevention and Treatment of Breast Cancer Jose Russo, 2021-07-26 The objective of this book is to provide a critical analysis of the present prevention strategies for breast cancer emphasizing the cost benefits and quality of life of the patient Rooted in the present knowledge of breast cancer biology and prevention and treatment options the book will describe the future tools that could be available to oncologists and how these new approaches may change the landscape of recurrence and survival of the disease Special emphasis will be given to the prevention strategies counterposing the present limitations and conflicting prevention guidelines for both hereditary and preventive non hereditary breast cancer and propose how the implementation of new strategies based on the present knowledge could save millions of lives and be more cost efficient The book will present a critical status of the treatment and prevention of breast cancer and detail how a quantum leap could be achieved in the field by applying present basic research knowledge to clinical application

Memoirs Of A Cancer Researcher Jose Russo, 2019-03-20 This narrative of a cancer researcher spans a period in which biomedicine research has been so revolutionary The educational background and socioeconomic circumstances of the author make the story unique shedding light on many important intellectual achievements The author also provides an insightful view on how decisions at the upper echelon of scientific institutions affect cancer researchers The vivid account of scientific discovery and intellectual evolution provides a fine example for the next generation of cancer researchers

Donato,Paul J. Higgins,Isabel R. Schlaepfer,Gustavo Cernera,2022-08-25 Plant-Based Therapeutics, Volume 2 Ivan A. Ross,2024-10-18 For centuries research has been conducted on the therapeutics of Brassicaceae plants and their health promoting effects Cato the Elder 234 149 BCE documented their properties in his work De agri cultura and recommended using cabbage to compress wounds swelling burns and bone dislocations For arthritis he recommended chopped raw cabbage mixed with coriander and cured cabbage mixed with vinegar and honey In a groundbreaking discovery in the 1990s scientists at Johns Hopkins University isolated sulforaphane from broccoli revealing its potent anticancer properties This naturally occurring compound has proven highly effective safe and tolerable and holds immense promise as a chemoprevention agent It has the potential to combat various cancers including breast prostate gastrointestinal melanoma lung brain and bladder But its potential does not stop there It also shows promise in treating cardiovascular and neurodegenerative diseases and diabetes offering hope for those affected The cancer protecting properties of Brassica plants are mediated through compounds that induce a variety of physiological processes including antioxidant action detoxifying enzymes inducing apoptosis and cell cycle regulation Glucosinolate breakdown products can affect several stages of cancer development including the inhibition of activation enzymes phase I and the induction of detoxification enzymes phase II Isothiocyanates and indole products formed from glucosinolates regulate cancer cell development by regulating target enzymes controlling apoptosis inhibiting angiogenesis metastasis and the migration of cancer cells and blocking the cell cycle Sulforaphane found in abundance in broccoli sprouts plays a crucial role in upregulating the transcriptional activity of specific genes and restoring epigenetic alterations This is particularly significant as it modifies epigenetic pathways by targeting histone deacetylases and DNA methyltransferases These modifications in turn alter gene transcription and expression particularly in the case of cancers This intricate process of gene regulation is a fascinating study area making broccoli sprouts a compelling component of the epigenetic diet Sulforaphane induces the cytoprotective enzyme NQO1 The inducible expression of NQO1 is regulated principally through the Keap1 Nrf2 ARE signaling pathway The activation of the Nrf2 Keap1 signaling pathway heralds the beneficial actions of drugs known to affect Nrf2 signaling such as dimethyl fumarate an FDA approved treatment for multiple sclerosis and bardoxolone methyl for chronic kidney disease There is optimism that the overall strategies are moving forward Sulforaphane rich broccoli sprout extracts provide one avenue toward this end *Role of Sex Steroids and Their Receptors in Cancers* Pia Giovannelli,Pandurangan Ramaraj,Cecilia Williams,2022-11-22 The Elusive Road Towards Effective Cancer Prevention and Treatment Franklyn De Silva,Jane Alcorn,2022-10-28 Cancer will remain a global major health problem unless new diagnostic prognostic and management approaches are discovered to address both loss of life and quality of life Here we summarize the general physiology pathology heterogeneity and evolution of cancer current status limitations and challenges associated with prevention incidence treatment survival and mortality as well as future directions with regards to solid tumors Perspectives are provided
