

Action Research for Professional Development

What is action research?

Action research is a term which refers to a practical way of looking at your own work to check that it is as you would like it to be. Because action research is done by you, the practitioner, it is often referred to as practitioner based research; and because it involves you thinking about and reflecting on your work, it can also be called a form of self-reflective practice.

The idea of self reflection is central. In traditional forms of research – empirical research – researchers do research on other people. In action research, researchers do research on themselves. Empirical researchers enquire into other people's lives. Action researchers enquire into their own. Action research is an enquiry conducted by the self into the self. You, a practitioner, think about your own life and work, and this involves you asking yourself why you do the things that you do, and why you are the way that you are. When you produce your research report, it shows how you have carried out a systematic investigation into your own behaviour, and the reasons for that behaviour. The report shows the process you have gone through in order to achieve a better understanding of yourself, so that you can continue developing yourself and your work.

Action research is open ended. It does not begin with a fixed hypothesis. It begins with an idea that you develop. The research process is the developmental process of following through the idea, seeing how it goes, and continually checking whether it is in line with what you wish to happen. Seen in this way, action research is a form of self evaluation. It is used widely in professional contexts such as appraisal, mentoring and self assessment.

online calculation model of rolling force for cold rolling mill - Nov 12 2022

jul 19 2012 abstract based on comprehensive consideration of elastic and plastic deformation of both strip and work roll an online rolling force model for tandem cold rolling mill has been developed by numerical integration method in this paper

methodology for calculation of rolling load and forces acting - Aug 09 2022

in this paper we have suggested the methodology for calculation of forces acting on the gear by using theory of hot rolling in this paper the analysis process is define by comparing the power and torque available at the input and the total power and torque required for hot rolling process

calculating power parameters of rolling mill based on model - Aug 21 2023

the authors assess the feasibility of using the known formulas and analyse the impact of the front and rear tensions on the power parameters of rolling mill the problem of developing an automatic tension control system for continuous mills with multi roll groove is substantiated

pdf application of an empirical model for - Jan 14 2023

oct 1 2019 pdf mathematical models for rolling force calculation during hot rolling are crucial for both automatic mill operation and prediction of steel find read and cite all the research you need

the calculation of roll force and torque in cold strip rolling - Feb 03 2022

from an approximate theory equations are derived for roll force and torque with and without front and back tensions applied to the strip where tensions are applied the calculations for each pass take about an hour without tensions and with the use of curves given in this paper they can be carried out in ten minutes

power in rolling idc online - Jul 20 2023

the torque is equal to the product of total rolling load and the effective moment arm since there are two work rolls torque mt 2p a consider two high roll mill as shown in the figure for one revolution of the top roll the resultant rolling load p moves

on the optimization procedure of rolling mill design - Oct 11 2022

nov 1 2014 pdf a procedure to optimize the rolling mill design will be discussed in this article various rolling models and optimization methods are applied in find read and cite all the research

rolling rajagiri school of engineering technology - Mar 04 2022

rolled to a thickness of 20 mm in one pass the roll radius is 300 mm and the rolls rotate at 100 rpm calculate the roll force and the power required for annealed copper it has a true stress of about 80 mpa in the unstrained condition and at a true strain of 0.223 true stress is 280 mpa

a calculation procedure and optimization for pass scheduling - Mar 16 2023

feb 6 2020 this paper provides an overview of pass scheduling and its calculation procedure for rolling forces and bending forces rolling is a process of reducing thickness of work piece by a

the calculation of roll force and torque in hot rolling mills - Jun 19 2023

abstract equations are derived for the normal roll pressure specific roll load and torque in hot rolling mills using the condition for plastic deformation in rolling derived by orowan together with von kármán's equation of equilibrium although applying strictly to the rolling of ideal plastic rigid materials these equations may be

a rapid calculation method for predicting roll deformation of six - Dec 13 2022

sep 15 2018 therefore a rapid calculation method for predicting roll deformation of a six high rolling mill was proposed which employed the finite difference method to calculate the roll deflection and used a polynomial to describe the nonlinear relationship between roll flattening and roll contact pressure

calculating power parameters of rolling mill proquest - Apr 17 2023

1 introduction rolling mills for the production of steel wire are classified according to the number of mill stand rolls which form the geometry of the deformation zone accordingly these can be categorised by the type of roll groove and the roll transmission path

open access proceedings journal of physics conference series - Sep 10 2022

analysis of loading modes of rolling mill electrical drives is a time consuming task associated with numerous mathematical calculations specialized software significantly facilitates calculations

calculation of rolling pressure distribution and force based on - Apr 05 2022

pdf on dec 1 2014 shuixuan chen and others published calculation of rolling pressure distribution and force based on improved karman equation for hot strip mill find read and cite all the

deformation processing rolling iit bombay - Jul 08 2022

calculate rolling power flat rolling analysis consider rolling of a flat plate in a 2 high flat rolling analysis friction plays a critical role in enabling rolling $\mu \tan \alpha$ cannot roll without friction for rolling to occur reversal of frictional forces at neutral plane n flat rolling analysis stresses on slab in entry zone ϕ

load calculation of the most loaded rolling element for a - Jun 07 2022

oct 3 2020 this paper presents a new model for calculation of load for the most loaded rolling element in a rolling bearing with internal radial clearance the calculation is based on a so called load factor by multiplying this factor by the value of the external radial load the load transferred by the most loaded rolling element of the bearing is obtained

pdf method of load calculation of electrical drives of rolling - May 18 2023

may 1 2018 an improved calculation method for rolling pressure and load torque of electrical drive engine is suggested further this method considers peculiar strain of product in high deformation zones

rolling iit bombay - Sep 22 2023

calculate rolling power flat rolling analysis consider rolling of a flat plate in mill v_0 v_f 2 roll q h_0 h_f v_0 width of plate w is large $\rightarrow$ plane strain processing limits

method of load calculation of electrical drives of rolling mills - Feb 15 2023

may 1 2018 an improved calculation method for rolling pressure and load torque of electrical drive engine is suggested further this method considers peculiar strain of product in high deformation zones and its accelerated motion in reverse mode improved analytical dependences for rolling pressure and load torque of electrical drive are reviewed

the calculation of rolling force innoval technology - May 06 2022

mar 26 2020 yield stress strain hardening factor $\times$ strain rate hardening factor $\times$ thermal softening factor in the rolling of aluminium it is strain hardening which typically dominates at low temperatures on the other hand strain rate and temperature are more important in hot rolling
